Panelboards

Introduction

General

This generation of panelboards from Siemens offers the high level of engineering and innovation you've come to expect from the leader in power distribution technology. The "P Series" line of panelboards offers a stepped approach to power distribution.

Additional strength has been added to an already rugged and durable panelboard family. Engineered specifically to provide maximum flexibility, the new designs simplify wiring and reduce material requirements making them easier to install and less costly than competitive products. At the heart of the product line is the extensive research and technology found among Siemens circuit protection devices – both fusible switches and molded case circuit breakers.

The line is anchored by the innovative P1. Featuring the industry's most flexible designs, the P1 virtually eliminates common errors, such as feed direction, and main lug versus main breaker. Increasing distribution is simplified by the ability to add feed-thru lugs. The Revised P1 design introduced in January 2015 has added Extended Circuits up to 66 and has available smaller Enclosures with no Subfeed option for added flexibility

Subsequent steps in the P Series offer increased capacity and more design options:

- The highly flexible P2 provides options to fit the most demanding specifications.

- Sized more like a lighting panel, the P3 packs the power of a distribution panel in a space-saving, highly flexible design.
- The P4 is a mid-sized distribution panel that allows both fusible and circuit breaker branch and main devices.
- The powerful P5 anchors the high end of the series. With larger fusible and circuit breaker branch and main devices, the venerable P5 delivers maximum power and flexibility to larger distribution systems.

Siemens also offers a number of specialty panels, like column panels, SEM3 (Embedded Micro Metering Module™), Disaggregation Panels (which are California Title-24 compliant), and others. Don't see a panel to meet your requirements? Ask your Siemens representative about our custom capabilities.

Features Overview

P Series lighting panel features include Fas-Latch trim, which is popular among installers; the jacking screw system, that permits adjustments even after wiring has been installed; our exclusive split neutral, and more. Many panelboards have the capability of mixing and matching breakers of different sizes and ratings – or changing from main lug to main breaker, or adding subfeed breakers without changing the box size. Other models accept a wide range of fuse types, including Siemens exclusive Vacu-Break® technology.

Key Panelboard Features

	P1	P2	P3	P4	P5

Accepts A Wide Range Of Circuit Breakers	•	•	•	•	•
Accepts PDS ACCESS Communications Tie-In ^②	—	•	•	•	•
Optional Compression Lugs	•	•	•	•	•

• Standard

① KO's available on P1 and P2 – 5.75" Deep x 20" Wide boxes and P3 7.75" deep X 24" wide boxes.

② Panelboards equipped with Siemens Sensitrip Circuitbreakers or Power Meters can be integrated into SIEMENS PDS ACCESS Electrical Monitoring System.

③ For Revised P1, only when Subfeed Space is selected, Interior Part Number ends with "T". When "N" is at end there is no Subfeed Space available

Panelboards

General Specifications

General

Class CTL Panelboards (when applicable)

Class CTL panelboards incorporate physical features which, in conjunction with the physical size, configuration, or other means provided in Class CTL circuit breakers, are designed to prevent the installation of more over current protective poles than the number for which the device is designed and rated, per UL 67 and National Electrical Code (NEC) NFPA70.

Service Entrance Equipment

When a panelboard is used as service entrance equipment, it must be located near the point of entrance of building supply conductors. In a main lugs only panel, the number of breakers or switches directly connected to the main bus must be limited to six. In a panel having a main breaker or main switch, the number of circuits are not limited except as may be provided under other panelboard requirements, i.e., lighting and appliance branch circuit panelboards. Also, panels must include a connector for bonding and grounding the neutral conductor.

UL67 requires Service Entrance Barriers for all Panels used for Service Entrance. Siemens includes these barriers in all Factory assembled panels and also has available Field Installable kits when needed.

Panelboard Code Data (where applicable)

Lighting and appliance branch circuit panelboards were included in editions of the National Electrical Code prior to 2008. The NEC no longer distinguishes between lighting and appliance panelboards and power panelboards; therefore, eliminating the 42 circuit branch circuit limitation. Adoption of this code vary by a state or local jurisdiction. Consult the local code authorities to determine if this has been adopted in that area.

Integrated Equipment Short Circuit Rating

The term "Integrated Equipment Short Circuit Rating" refers to the application of series connected circuit breakers in a combination that allows some breakers to have lower individual interrupting ratings than the available fault current. This is permitted as long as the series combination has been tested and certified by UL.

Standards

NEC: 2014 (where accepted)

NEMA: PB1.1

UL: 67, 50 and 50E. Listed by Underwriter's Laboratories, Inc., under "Panelboards" File #E2269, and #E4016. Meets Federal Specification W-P-115c.

Wire Connectors

Standard wire connectors in Siemens panels are suitable for copper or aluminum cables rated 60/75 degree. Copper main lugs are a price-added option for most panel types and some Circuit Breakers (check with Siemens sales for availability). It should be noted that most copper lugs will only accept copper cables. Some applications, 100% rated devices in particular, require that the cable and connectors be rated 90 degree but are sized to the 75 degree tables.

Standard ground connectors are also suitable for copper or aluminum wire. Ground connector assemblies (EGK, IGK) have (6) 1/0 max. and (15) #6 max. connections. The 1/0 holes are

capable of connecting up (3) #10 max. wires. The #6 holes can accept up to (2) #12 max. wires. Copper ground assemblies (ECGK, ICGK) are rated for copper wire only and have the same wiring capacity as the Al/Cu connectors.

Standard neutrals, like standard main lugs, are also rated for copper or aluminum wire. The neutral cross bar material follows the selection bus. Copper neutral lugs are rated for copper cable only and available as a price added option.

Lug Data

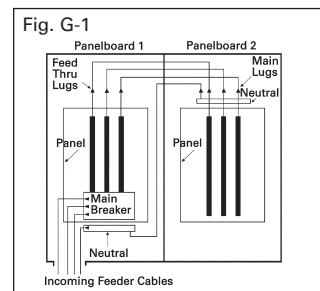

Space Required for Mounting of Double Panels

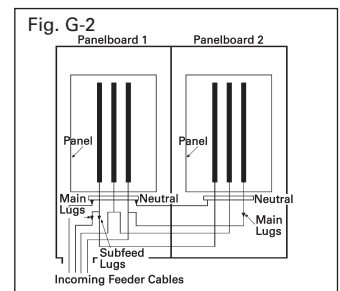

Use two or more panelboards with feed-thru or subfeed lugs when:

1. Lighting and appliance panelboards are required with more than 42 circuits in areas where the zone code has not been accepted.
2. More circuit mounting space is required than is provided in the largest box size

Feed-Thru Lugs

Subfeed Lugs or Double Lug

Feed-thru lugs are mounted at the opposite end of the main bus from the main lugs or main breaker and are used to connect two or more panelboards to the incoming feeder. The feeder cables are brought into Panelboard 1 and connected to the main lugs or main breaker. Cables interconnecting the two panelboards are connected to the feed-thru lugs in Panelboard 1 and are carried over the main lugs in Panelboard 2. This arrangement could be reversed with the main lugs located at the top and the feed-thru lugs at the bottom of the panel.

Subfeed lugs are mounted directly beside the main incoming lugs and are used to connect two or more panelboards to the incoming feeder. The feeder cables are brought into Panelboard 1 and connected to the main lugs. Another set of cables that are the same size are connected to the subfeed lugs of Panelboard 1 and are carried over the main lugs of Panelboard 2.

Note: P1 panelboards do not have subfeed lugs available. If this configuration is needed, move to a P2 or P3 panelboard.

Panelboards

General Specifications

General

Bussing Sequence

Interiors are designed to accommodate top or bottom feed. Regardless of which is specified, the uppermost pole is always on "A" phase; the second pole down is always on "B" phase, and the third pole down is always on "C" phase (assuming 3Ø panel).

As standard, branch breakers shall be mounted at the top of the panel with "spaces" at the bottom, regardless of the direction panel is fed.

All breakers have bolted connections except plug-in type. The panel design provides bracing up to 200,000A IR UL short circuit rating. Case-hardened, high performance, thread rolling screws are used on branch bus.

Panelboard Ratings (Updated June 2014 with release of Revised P1 design)

[ⓐ] Functional pricing is based on circuits shown. However, the panel can be figured with less circuits.
[ⓑ] P1 can have max. 1 subfeed breaker when Subfeed Space is available. P2 and P3 can have up to (2) FD subfeed breakers.
[ⓒ] JD and FD breakers are mounted vertical. Limitations apply.
[ⓓ] Trim ring provided for flush applications.

[ⓔ] A maximum of (4) QJ/QR breakers may be mounted in a P2 Panel and are single mounted.
[ⓕ] A maximum of (6) QJ/QR breakers may be mounted in a P3 panel and are twin mounted.

[ⓖ] P1 panels with xGB breakers are limited to xGB branch devices only. BL and BQD frames may not be mixed in this panel type.
[ⓗ] Factory assembled P1 has capability of 600Y/347V AC system when the proper breakers are selected.
[ⓓ] BQD6 is not UL Listed. Only for CUL and CSA panels.

① Lock kits include one replacement lock with 2 keys #B363A
 ② See Contact list below or Contact Customer Support for re-ordering special keyed locks as needed.
 ③ The lock options for Yale 511, BEST, Corbin 15751 and Corbin 15757 CANNOT be used in 12GA and 10GA fronts, or with any 304 Stainless Steel Fronts.
 ④ Factory has final determination on whether combinations of non-standard features are available. Contact Customer Support for complex front configurations.

⑤ The factory does not stock keys for these locks. It's the customer's responsibility to obtain it from outside sources. See contact info for special keys below.
 ⑥ Nema 3R/12, Nema4, Nema4X SS, Nema 4X non-metallic Enclosures cannot be used with the fas-latch lock assy.
 ⑦ Consult Factory or Customer Support for any other special lock requirements.

Contacts for Special Keys:	
National C413A	Go to this website: http://compX.com/dist-csp.html ==> then lookup a distributor in your area to get keys. Or call 864-297-6655
Corbin TEU1 or CAT 60	Contact your local distributor for special keys
Yale LL803 / GE 75 (Corbin TEY)	Contact your local distributor for special keys

PANELBOARDS
11

The standard Siemens P1 panelboard has some unique features that make it easier to design for an engineer, easier to reconfigure in the field for a contractor, and easier to upgrade and maintain for the Owner. The P1 is the smallest panel in the Siemens lineup, with bus sizes up to 400A. What makes it different is the split neutral design and the open ended bus. In the Siemens panel, instead of the common single neutral bus on one end, we have a neutral bus on both sides that is cross-bussed. This makes branch wiring simpler and cleaner – the lead lengths for line and neutral can now be made nearly the same, creating more room and a neater installation. It also allows access to both ends of the bus as a standard feature – this provides the flexibility to make changes in the field, even if it wasn't part of the original configuration. New Revised P1 introduced in 2015 has extended circuits up to 66 available and also non-feed thru versions are available, without the Subfeed Space, in a 6" smaller enclosure.

MAIN BREAKER or SUB-FEED BREAKER

MAIN LUGS or FEED-THROUGH LUGS

INTEGRAL BUS MOUNTED SPD

The following can be done to a standard P1 panelboard **in the field** with no modifications:

- Change from top fed to bottom fed
- Add feed-through lugs[Ⓞ]
- Add an Integral bus-mounted SPD[Ⓞ]
- Add a sub feed breaker up to 250 amps[Ⓞ]
- Change from Main Lugs to Main Breaker
- Change from Main Breaker to Main Lugs
- Panel may have up to two ground assemblies. Options are: (a) standard aluminum, (b) optional copper, or (c) optional insulated/isolated aluminum or copper. Mounting provisions in opposing corners of the box are standard. Any of these options may be added after installation.

[Ⓞ] Only when Subfeed Space is selected/available.

Panelboards

Unassembled

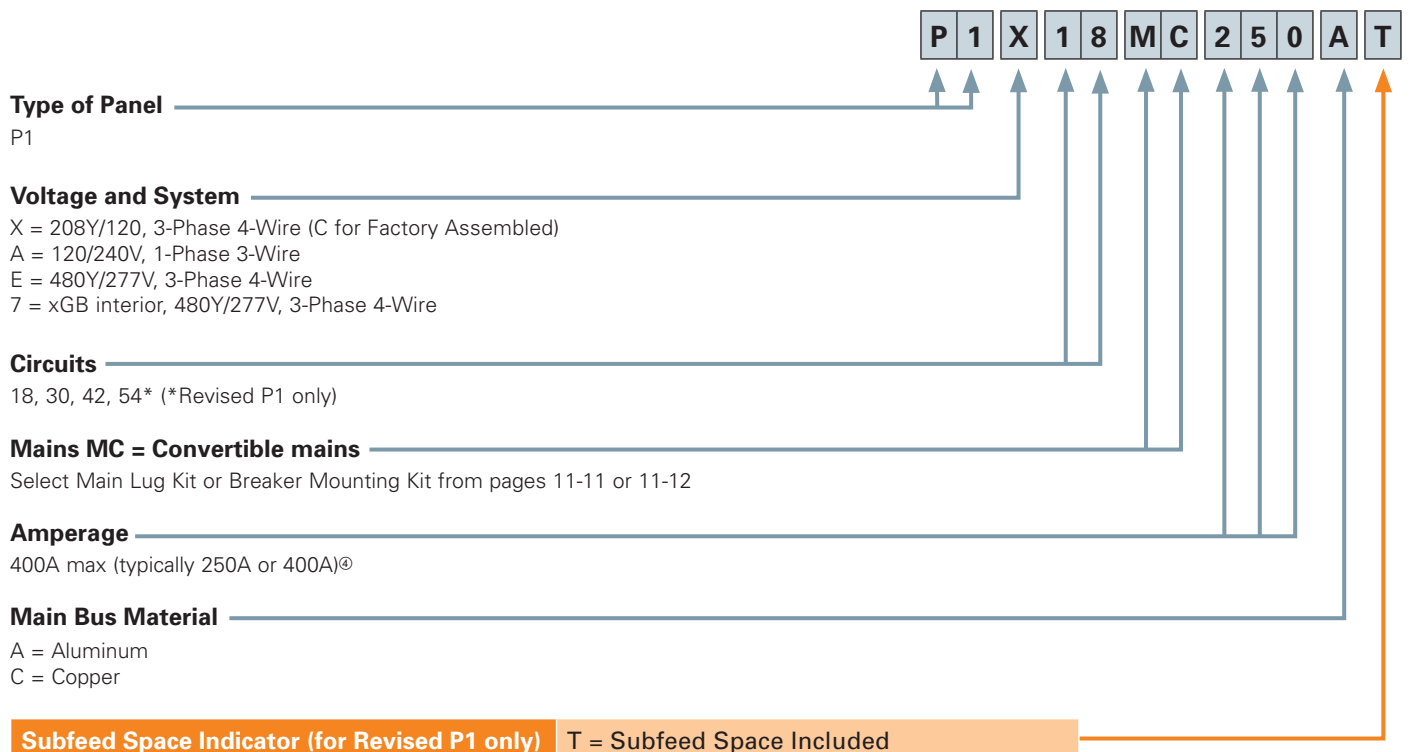

Reference

Type P1 unassembled panelboards are completely convertible from main lug to main breaker and vice-versa. Additionally, feed-thru lugs up to 400 ampere or subfeed circuit breakers up to 250 ampere can be added without increasing the box height for Revised P1 with "T" suffix, see the chart.

1. When BL / BQD or GB Main Breaker is chosen as back-fed in unit space, the Main Breaker will use 2 or 3 positions of unit space and will reduce usable branch circuit space.
2. List catalog number and price of interior, box and front.
3. Select main lug kit or main breaker kit from appropriate tables.

- Note:** Main/Subfeed Breaker mounting kits may be ordered with or without breakers included, see page 11-11 and 11-12 for selection.
4. List required branch circuit breakers and filler plates to cover any unused positions.
 5. Select any modifications or accessories.

Note: Revised P1 was introduced in 2015. All original P1 devices do not include the "Subfeed Space" Indicator. All original P1 included the Subfeed Space as standard.

Note: Standard bussing in P1 panels is tin plated for aluminum and copper. Standard bus is temperature rated to the maximum amperage in the panel.

Branch Breakers

Panel Type	Voltage (Max.)	Breaker Type	Additional Information
P1, Revised P1 ^①	240	BL, BLH, HBL, BQD, NGB, HGB, LGB	See Page 11-13
	480 / 277	BQD, NGB, HGB, LGB,	
	600 / 347 ^③	BQDG ^② , NGB, HGB, LGB	

① Consult sales office for availability of CSA.
 ② See Speedfax for additional information.
 ③ 600/347V options are not available in a UPB panel – see factory assembled section.
 ④ P1 panels use either 250A rated bus or 400A rated bus, regardless of the Main Breaker installed (or) MLO Amp rating chosen.
 Panels with 250A bus can have up to 250A Main Breaker or Main Lugs. Panels with 400A bus can have up to 400A Main Breaker or Main Lugs.

① 400 amp kit is for main only — not allowed for subfeed breaker.

② MBKBF kit is available to mount BL/BQD/xGB 2-pole or 3-pole in unit space as a "Back-Fed Main". This occupies breaker space and reduces circuit count by 2 or 3 positions. (includes Neutral Lug, "MAIN" label and instructions).

③ Although QR is rated 250A, it is limited to 225A in panelboard.

^① Kits are for Main only. New "Revised P1" kits can be used for either top feed or bottom feed.

NOTE: "Revised P1" Kits above only work for interior numbers ending in "T" or "N". Use "Original P1" kits for all others.

Branch Breakers Selection for P1

Selection Guide

1. Select breaker type.
2. Select required amperage.
3. Select number of poles.
4. Select branch breaker catalog numbers.
5. Select ground bar and filler plates.
(See replacement parts & accessories on Page 11-11.)

300A Main installed.
These Revised P1 kits can now be used as top or bottom feed.

^① Built to order. Additional "circuit" is included for neutral (via pigtail) and is NOT connected to bus. 2-pole is one

phase and one neutral pigtail. 3-pole is two phase connections and one neutral pigtail.

^② Allow 8-10 weeks for delivery

^③ UL Listed as SWD (Switching Duty) Rated, suitable for 120V AC fluorescent lighting

Panelboards

Panelboard Replacement, Modification, and Additions

Selection

S1/S2 Panels—All the original P1 panel kits for 250 amp and below panels will work for 250 amp maximum S1/S2 panels (will not work for S1/S2 400A and above).

Note: Revised P1 kits will not work with S1/S2 or SE Panels.

400/600 Amp S1/S2 and All SE Panels

Lug Kits — Main or Feed Thru

Ampere Rating	Material	Wire Range	Service	Catalog Number
125A/250A	Al/Cu	(2) 1/0–250 kcmil	1-Phase	MLKA1
125A/250A	Al/Cu	(2) 1/0–250 kcmil	3-Phase	MLKA3
400A/600A	Al/Cu	(2) #4–250 kcmil or (1) 3/0–500 kcmil	1-Phase	SMLKA1
400A/600A	Al/Cu	(2) #4–250 kcmil or (1) 3/0–500 kcmil	3-Phase	SMLKA3

Other applications:

For P4/S4 and 10" deep SPP panels see page 11-77 for branch breaker mounting kits.

For P5/S5 and 12.75" deep SPP panels see page 11-91 for branch breaker mounting kits.

For P4/F1 and 10" deep FPP panels see page 11-77 for branch fusible switch mounting kits.

For P5/F2 and 12.75" deep FPP panels see page 11-91 for branch fusible switch mounting kits.

For Series 5, Series 6, CDP6 and VB 6 panels as well as FC20, FCI, FCII, SB1, SB2 and SB3 distribution switchboards, see page 12-32 for branch device mounting kits.

[®] Standard bussing in P1, P2 and P3 panels is tin-plated for aluminum and copper. Standard bus is temperature rated to the maximum amperage in the panel.

[®] Not available for Revised P1 xGB interiors.
[®] BQD6 is not UL Listed. Only for CUL and CSA panels

[®] P3, P4, P5 enclosure height tables found on page 11-41, 11-70 and 11-85. These show the amount of unit space available.

Panelboards

Type P1

- To specify a particular panelboard; list panel catalog number, branches, modifications, and price on an Estimate Sheet. Price includes interior with provisions, box, ground bar, and trim. See Example No. 1.
- When more than 66 circuits are specified for P1 a two section panel will be required. Feed-thru lugs must be priced in one section from the modifications on pages 11-24.

NOTE: This panel does not require Subfeed Space — indicated by "N" suffix

Panel LPA		
1 — P1C30QR225ATSN		2540.
10-20/1	25. ea.	250.
4-30/3	140. ea.	560.
		3350.

Example No. 1 (pricing not current)

Example No. 2 is a two section panel, each having 42 circuits. Section One will contain 1-225/3 QR2 main breaker (top feed), 250A feed-thru lugs and 21" of unit space. Section Two will contain 250A main lugs only (bottom feed) and 21" of unit space. Sections will be 44" in height.

NOTE: This panel does includes Subfeed Space — indicated by "T" suffix

Panel LPB		
1 — P1C42QR225ATST		2760.
1 — P1C42ML250ATST		1330.
1 — Feed-Thru Lugs		190.
		4280.

Example No. 2 (pricing not current)

- Standard main breakers are indicated by the 6th and 7th positions in the catalog number. If any other main breaker type is required, replace with the appropriate code from page 11-16. See Example No. 3.
- All panel modifications must be listed and priced separately.
- If the boxes are to be sized the same then each panel must have the same amount of unit space.

NOTE: This panel does includes Subfeed Space — indicated by "T" suffix

Panel LPC		
1 — P1C42HF250CTST		3160.
HFD6 Main		1900.
42-20/1 BLH	35. ea.	1470.
Cu Bus		255.
Type 3R		860.
		7645.

Example No. 3 (pricing not current)

Type P2

Type P2 panelboards are priced the same as Type P1 described above except for two section panels.

- When more than 42 circuits are specified for P2, a two section panel will be assumed. Main breaker codes in the 5th and 6th positions will dictate the use of feed-thru lugs. An "ML" in the fifth and sixth positions will dictate the use of subfeed lugs for 125A and 250A and feed-thru lugs for 400A and 600A.

Boxes will be sized the same for two section panels.

Base price includes all provisions. Subfeed or feed-thru lugs as required must be priced separately.

Example No. 4 is a two section panel, each having 42 circuits. Section One will contain 1-400/3 JXD6 main breaker (top feed), 225A feed-thru lugs, and 21" of unit space. Section Two will contain 400A main

lugs only (bottom feed) and 21" of unit space. Sections will be 53" in height.

Types P3, P4 and P5

- To specify a particular panelboard, first determine voltage, system, amperage and type of main, amperage and type of branch devices, and modifications if any. (Step 1)

- List branch devices and modifications requiring space additions. List unit space requirements of each.

Note: Some units are twin mounted meaning two breakers occupy the same unit space.

Select appropriate enclosure height from selection chart on pages 11-41, 11-70, or 11-85, based on unit space requirements. (Step 2)

- Select panelboard catalog number from appropriate table based upon voltage, system, amperage and unit space requirements. (Step 3)

Step #1

Amperage	400
Voltage	208Y/120
System	3-phase 4-wire
Main	Main Breaker
Branches	5-125/3, 2-225/3, 1-250/3
Modification	None
Feed	Top
Mounting	Surface

Step #2 Unit Space Calculation

5-125/3 QR2	5" = 15"
5-225/3 QR2	5" = 5"
1-250/3 FXD6	5" = 5"
	25"
Enclosure is B275 from Selection Chart on page 11-48. (32" wide, 75" high, 10" deep).	

Step #3

1—P4C75JX400ATS		\$ 4210.
5-125/3 QR2	940.	4700.
2-225/3 QR2	940.	1880.
1-250/3 FXD6	2700.	2700.
		13490.

(pricing not current)

Panelboards

Circuit Breaker / Lighting and Distribution

 11
 PANELBOARDS

Revised Type P1

**480Y/277 Vac Maximum
600Y/ 347 Vac Maximum (limited
applications)
400 Ampere Mains
400 Ampere Maximum Branch
UL Short Circuit Rating —
200,000 A. @ 240 Vac / 100,000 A. @
480/277 Vac. IR Maximum**

**Branch Breaker Symmetrical
Interrupting Capacity**

Based on Underwriters' Test Procedure

Feed thru and subfeed lugs may result in lower interrupting ratings if not protected by a main device. Consult sales office.

Meets 2014 NEC wire bending requirement, section 408.55.

Meet Federal Specification W-P-115C.

Panelboards

Listed by Underwriters' Laboratories, Inc., under "Panelboards" File #E2269 for interiors and #E4016 for boxes and fronts.

Service

1-phase 2-wire - 120 Vac, 240 Vac,

1-phase 3-wire - 120/240 Vac,

3-phase 3-wire - 480Y/277 (when derived from 3-phase 4-wire system), 240 Vac, 120 Vac

3-phase 4-wire - 208Y/120 Vac, 480Y/277 Vac, 600Y/347 Vac, 380/220 Vac.

Panelboard Fronts and Doors

Standard panelboards are furnished with trim featuring concealed fasteners and hinges with a flush door lock. All are factory-assembled for ease of installation. Fronts are fabricated from code gauge steel and finished ANSI-61. See page 11-6 for optional fronts.

Main Breakers

BL, BLH, HBL, NGB, HGB, LGB, BQD, ED4, ED6, HED4, QR2, QRH2, HQR2, HQR2H, FXD6, FD6, HFD6, HFXD6, JXD6, JD6, HJXD6, HJD6.

(All main breakers except 400 amp frame are mounted horizontal.)

Note: Revised P1 interiors with BL, BQD or GB Type Mains can be Back-fed in unit space. See special Notes for unit space reduction.

Ⓢ P1 400 amp main breaker panels have wire bending space available for 600 kcmil.

Ⓢ 400A main breaker is vertical mounted.

For inches / millimeters conversion, see Application Data section.

Main Breaker Panel Connectors

Ampere Rating	Connectors Suitable for Cu or Al
100	(1)—#14 1/0 AWG
125	(1)—#4 1/0 AWG
225	(1)—#4 AWG-300 kcmil
250	(1)—#4/0 AWG-350 kcmil Al (1)—#6/0 AWG-350 kcmil Cu
400 [Ⓢ]	(2)—#3/0 AWG-250 kcmil Al or (1)—#3/0 AWG-500 kcmil Al

Connector ranges indicated do not apply to all main breaker types. Refer to molded case circuit breaker standard pressure wire connector chart (Section 7) for the connector range of a specific frame.

Main Lug Connectors

125	(1)—#6 AWG-350 kcmil
250	(1)—#6 AWG-350 kcmil
400 std.	AL (2) 110-250 kcmil or (1) #2 AWG-600 kcmil
400 opt.	CU (2) 1/0-4/0 or (1) 110-600 kcmil
400 opt.	AL (1) AL 1/0-750 kcmil (2) AL/CU 250 kcmil max. [max. (1) 600 kcmil (1) wire]

Boxes

20" wide, 5.75" deep

- End walls are blank as standard.
- End walls with knockouts will be supplied at no charge on 5.75" deep panels if requested at time of order.

Main Breaker Gutter Dimensions (inches)

Main Breaker	Side Gutter		Neutral Location
	20" w/box	24" w/box	20" w/box
BL, BLH, HBL	8.680	10.690	10.500

Weight — Approximate

Total panelboard weight when filled with a normal quantity of breakers and accessories is:

- About 3 lbs. per inch of box height

Gauge Steel Boxes (Type 1)

Width	Height	Gauge Steel
20"	All	#16

Fronts — Surface, Flush (Type 1)

20"	All	#14
-----	-----	-----

Series Connected Short Circuit Ratings

The term "Series Connected Short Circuit Rating" refers to the application of series connected circuit breakers in a combination that allows some breakers to have lower individual interrupting ratings than the available fault current. This is permitted as long as the series combination has been tested and certified by UL.

The table below lists specific main and branch breaker series combinations that are marked on all P1 panels. All combinations shown have been tested for use in P1 panelboards and are UL listed. Other combinations are available. See Circuit Breaker Section, of this book.

These series ratings must be specified on order at time of entry.

Ⓢ See Branch Breaker Side Gutter Chart for Revised P1 Backfed Options.

Panelboards

Circuit Breaker / Lighting and Distribution

Selection

Shown with Standard Mains, Top Fed and Surface Trim
Catalog number is for aluminum main bus. For optional copper main bus change "A" in position 11 to "C".

Panels are top feed, surface mounted. For bottom feed, change "T" in position 12 to "B". For flush mounting, change "S" in position 13 to "F".

Replace fifth and sixth position in panelboard catalog number, with alternate main breaker code.

Note: Original P1 was produced until 2015 and in January the revised P1 was introduced. All interior numbers that end with "T" or "N" are the new Revised interiors. "T" at end of catalog number indicates there is a Subfeed area available. "N" at end of catalog number indicates there is no Subfeed area available.

Note: Main breakers use breaker connectors. For sizes, see breaker connector chart. 400A MLO Panels have wire bend space for 600kcmil CU & AL wire when using standard lugs. With optional 750kcmil AL/CU connectors, wire bend space is available for up to 750kcmil AL wire, but is still limited to 600kcmil CU wire.

Ⓢ 400A 66 circuit only available with non-feed thru versions.

Ⓢ BL, BLH, HBL, BQD, and xGB mount in unit space and count in max. # of poles.

① Unit space is 1 inch per pole, except for Special Application with accessory included.
 - No branch kits available, unit space for all branch positions is twin mount.
 - Branch space is either for BL/BQD only (or) for xGB/3VA41 only. (after 3VA41 is made available).
 ② BLG: Two-pole breaker is one phase and neutral. Three pole is two phases and neutral
 - See SpeedFax Page 7-31 for additional info. Some are Built to order. Allow 2-3 weeks delivery.

③ Availability and additional specs tbd, expected late 2019. (COMPAS may allow selection of alternate trip units)
 ④ 110A-125A BL/BLH (2-pole only) available as Main or Subfeed only in Revised P1 panels.
 ⑤ Approved for CSA and UL Listed.
 ⑥ Approved for CSA but not UL Listed.

① 400 amp kit is for main only — not allowed for subfeed breaker.

② MBKBFA kit is available to mount BL/BQD/xGB 2-pole or 3-pole in unit space as a "Back-Fed Main". This occupies branch space and reduces circuit count by 2 or 3 positions. (includes Neutral Lug, "MAIN" label and instructions).

③ Although QR is rated 250A, it is limited to 225A in panelboard.

Table P1-9 – Lug Kits (Main or Feed-Thru)

P1CONACPHCU ^{④⑤}	Connector kit – 6 pcs. A or C-phase Copper
MBKQRFK	P1/Revised P1 Filler for 1PH/3PH QR. Horizontal mount only.
ANSI/NEMA PB 1.1-2013	General Instructions for Proper Installation, Operation, and Maintenance of Panelboards Rated 600 Volts or Less (O&M Manual) ^②

① Replacement parts only.

② PDF can be downloaded (at no cost) and printed at: www.nema.org/standards/pages/Panelboards.aspx

③ Factory installed and Field installable Service Entrance Barrier kits are now available as required by UL67. (In COMPAS, you must select Service Entrance Required.)

④ Use for both CU + AL bus interiors.

Panel Options

Enclosures

- Extra gutter to sides or ends of the can
- 24" wide boxes
- Hinged to box trim
- Door-in-door trims
- Screw to box trims
- Piano hinge trims
- Painted boxes (ANSI 61 Light Gray is standard color)
- Custom colors
- Increase gauge trims and boxes (See pages 12-13)
- Stainless steel trims (304 SS only) for Type 1 enclosures
- Type 1 enclosures (Std 16 Gage / Optional 14 or 12 Gage)
- Type 1 Standard are A60 Galvanealed non painted (Painted Type 1 use HRPO material)
- NEMA 3R/12 enclosures 16 Gauge Can w/ 14 Gauge front)
- NEMA 4 enclosures (14 Gauge only)

- NEMA 4X enclosures (14 Gauge only - 304SS Std, 316SS Optional)
- Special Keyed Locks (Keys are not supplied)
- Panel skirts
- Gaskets between trim and box

Panel Modifications

- Main Bus
Standard main bus is tin-plated aluminum. For copper main bus, add from the table for each panel. Includes copper neutral cross bar. For copper neutral branch lugs, see miscellaneous.
- Compression lug for MLO^①
- Contactor mains - Mount in 23" enclosure ahead of panel.
 - Asco 920 through 225 amps^②
 - Asco 911 through 150 amps^②
 - Siemens LEN through 30 amps^②
- Branch and main breaker accessories
 - Handle blocks
 - Handle locks
- Feed-thru lugs^③
Cannot be used in conjunction with SPD/TVSS or subfeed breakers. Do not add height to the panel.

- Copper lugs, mechanical line and branch neutral^①
- Bus mounted SPD/TVSS^②
- Service entrance labeling
- Factory installed and Field installable Service Entrance Barrier kits are now available as required by UL67
- Grounding of Panelboards
Ground Bars except for brazed to box are shipped with the panel interior.
 - Non-Insulated Equipment Ground Bar – standard
 - Copper Non-Insulated Ground Bar – optional
 - AL Insulated Equipment Ground Bar – optional
 - CU Insulated Equipment Ground Bar – optional
 - Ground Bar Brazed to Box (recommended for painted boxes)
- Shunt Trip on Main or Branch^②
BL, BLH, HBL, BQD, xGB as branch use
1" unit space for shunt trip.

Feed-thru Lugs Amp Rating	Type	Connector CU/AL Range
250	AL/CU Mechanical	(1)-#6 AWG-350 kcmil
	CU Mechanical	(1)-#6 AWG-350 kcmil
	AL/CU Compression	(1)-#6 AWG-350 kcmil
400	AL/CU AWG Mechanical	(2)-#1/0 - 250 kcmil or (1)-#2 AWG-600 kcmil
	CU	(1)-1/0-600 kcmil (2)-1/0-4/0
	AL/CU Compression	(1) 400-600 kcmil AL (1) 400-500 kcmil CU

HFXD6, JXD6, JD6, HJD6, HJXD6

- Remote control switches – 480V AC max. mounted in a 23" enclosure to be cable connected to the panel.
- Time Clocks – mounted in a 23" enclosure to be cable connected to the panel. Torq time clock can be supplied and mounted in panelboard cabinet.

Time Clock Information and Options
Time Clock (1- or 2-Pole, Single or Double Throw Contacts, 3-Pole Single Throw) 277V Maximum with Plain Dial
Options:
Astronomical Dial
An Omitting Device
Reserve Power or Carryover
Space and Mounting Provisions Only

- 200% neutral^①

Note: Specify copper or aluminum cable.

① Do not increase panel or enclosure size.
 ② Accessories on 1" pole breakers (BL, BQD, xGB, ED) will take 1" unit space.
 ③ External to the panel, supplied in a separate enclosure.

Panelboards

Selection

Compression Lugs

Table P1-19 – Lugs

Style	Amp Rating	Breaker Type	Compression Connectors	Box Height Addition	
MLO	125	N/A	(1) #6 AWG - 350 kcmil	None	
	250				
Main Breaker	400	N/A	(1) 400 - 600 kcmil AL (1) 400 - 500 kcmil CU	None	
	125		ED4, ED6, HED4		(1) #14 AWG - 2/0
	225		QR2, QRH2, HQR2, HQR2H		(1) #6 AWG - 350 kcmil CU or AL
Main Breaker	250	FXD6, HFD6	(1) #6 AWG - 350 kcmil CU or AL	Box must go to 24" wide	
	250				

Note: Standard compression lugs used for P1 panels are range taking lugs and require a particular crimping tool (tool is Hubbell/Anderson Versa Crimp VC6 -for 250A) to accommodate the range. Consult factory for information. 200% neutral not available with compression lugs. xGB breakers cannot accommodate compression lugs. (For 400A tool use Hubbell/Anderson Versa Crimp VC6FT/VC7FT - see instruction sheet for details.)

Enclosure Modifications

NEMA-4-Water Tight, Dust Tight, Steel Enclosure

(Actual NEMA-4 enclosure is larger than standard Type 1 enclosure. See chart below for reference to approximate actual size.)

Table P1-20

Standard Box Height (in inches)	Actual NEMA 4 Enclosure Size		
	H	W	D
32	32	20	8
38	42	30	8
44	48	36	8
56	60	36	10

Note: Larger NEMA 4 enclosures are not available.

PANELBOARDS 11

Type 1 Box

Box is symmetrical

(UL approved construction. 16 Gage Steel or equivalent alternate Construction. 14 or 12 Gage is available as an optional special order.)
G60 Galvanized is standard without paint.

Type 3R and 3R/12 Box

⓪ Dimensions are interior of the box. Add 5/8" to width for absolute dimension. Add 1/8" to height for absolute dimension.

(UL approved construction. 16 Gage Steel Can with 14 Gage front or similar approved construction.)
A60 Galvannealed with ANSI 61 light gray paint is standard.

Dimensions shown in inches and millimeters [].

Panelboards

Type P2 Panelboards

General

Features

Flexibility is the hallmark of the P2 panel. This panel offers a wide array of factory-assembled options to meet almost all lighting panel applications. With this design, the ability to mix breaker frames in unit space up to 250 amps will also meet many distribution panel requirements in a much smaller package. Bussing options for the P2 vary from the typical temperature rated to 750 A/Si aluminum to 1000A/Si copper. Standard bussing in the P2 panel is tin-plated. Silver-plated copper is also offered as an option. Integrated time clocks, bus mounted contactors, as mains or sub mains, split bus, and subfeed lugs (up to 400 amp) are just a few of the options of this unique panel.

Like a lighting panel, P2 is set up around 18, 30, 42, 54, 66, 78, and 90 circuit configurations. It will also allow the user to configure the panel to the smallest possible size. The P2 panel starts with 9" of unit space (18 circuits of 1" pole breakers). Breakers mounted in unit space can be mixed and matched to meet customer requirements. All 1" pole breakers (BL, BQD, xGB, xGB2, ED frames) are mounted in 3" or 6" pole increments. Breaker frames, above 125 amps, are mounted in 6" single breaker mountings.

As an example of a minimum panel, (6) 20 amp 1-pole BL breakers (3" of unit space) and a 3-pole 225 amp QJ breaker (6" of unit space) equaling 9" of unit space can be configured in a P2 panel without any extra provisions or space required. FD 250 amp and JD 400 amp breakers are mounted as subfeed breakers outside of unit space.

Another unique feature of the P2 panel is that blank unit space can be added to allow for future expansions or modifications. Any expansions or modifications must be in 3" increments. BL, BQD, xGB, xGB2, and ED frame breakers have 3" or 6" pole kits, and can be mixed in unit space by these increments. Breakers of the same frame can cross from one mounting to another if contiguous. QR frame breakers are mounted in 6" increments for two- and three pole, single mounted units. Changes in the unit space length for BL, BQD, xGB, xGB2, or ED frame breakers require an addition deadfront, center strip kit. Check with sales or the factory for additional unit space kits.

Main Lug / Main Breaker

Enclosure – Standard Type 1 enclosure is 20" wide x 5.75" deep X. Box Height is determined by main device and unit space. See charts for box height.

Voltage – 600V AC max.
250V DC max.

Amperage – 600 amp max.

Short circuit rating – 200 KAIC max. symmetrical or equal to the lowest rated device installed unless a series rating is indicated. Panels with subfeed or feed-thru lugs without a main device, circuit breaker or fusible unit, are limited to a three-cycle rating. The three-cycle rating for the P2 panel is limited to 22 KAIC. Note that the main device may be mounted remote from the panel.

Bussing – The P2 panel has more options to meet market requirements. The standard bussing is temperature rated aluminum. The rating is per the requirements of UL 67 – the standard for panelboards. All aluminum bussing is tin-plated. Optional bussing for the P2 panel is: 750 A/Si aluminum, temperature rated copper, and 1000 A/Si copper. The copper bus option for this panel is tin-plated.

Weight – Approximate

Total panelboard weight when filled with a normal quantity of breakers and accessories is about 3 lbs. (1 kg) per inch (54g per mm) of box height.

Gauge Steel of Boxes/Fronts, Surface and Flush (see pgs. 11-6 & 11-7)

Dimensions in Inches (mm)		Gauge Steel

Panelboards

Type P2 Panelboards

Selection/Dimensions

PANELBOARDS 11

Standard Circuit P2 Panels (Neutral Configurations for up to 54 circuits max.)

Table below shows minimum Box Size required for the Unit Space indicated with the Main Option at the top of each Column.

- Adding other options generally will add to the box Height when configured in COMPAS. Also, there may be cost adders with each option.

- The maximum number of 1" circuits supported is show at the bottom of each column in brackets. [54p] = max 54 poles of 1" circuits supported (BL, BQD, ED, xGB, xGB2).
- Unit space is available in 9", 15", 21", 27", 33", 39", and 45" sizes.
- Within unit space listed, the neutral will support up to 54 circuits.

- When more than 54 circuits are required, COMPAS will configure with larger Extended Circuit Neutral - see Extended Circuit Neutral chart below for minimum box sizes.
- Box sizes available: 26", 32", 38", 44", 50", 62", 68", 74"

Extended Circuit P2 Panels (Neutral Configurations for more than 54 circuits)

When COMPAS configuration has more than 54 circuits, the large neutral configuration is needed. Box size shown is the minimum available without any options.

- Unit space of 33", 39", and 45" are available.
- Unit space will be reduced by selecting some options such as Feed-through lugs, Surge Protection Devices, and the other Subfeed options.
- In general, vertically mounted mains require 6" more box space than equivalent horizontally mounted mains.
- Neutral configuration supports a maximum of 90 1-pole breakers.

When an ED4, ED6, HED4, HHED6, QR2, QRH2, HQR2, HQR2H, FD6, HFD6, or FXD6 frame main breaker is required to be vertically mounted, pricing will typically be higher.

Vertically Mounted Main Breaker (available in 2-pole or 3-pole)

Ampere Rating	Breaker Type(s)	Additional Unit Space (in.)
125	ED4, ED6 ^⑤ , HED4, HHED6	6
225	QR2, QRH2, HQR2, HQR2H	6
250	FXD6, FD6, HFD6	6

Subfeed Breakers (available in 2-pole or 3-pole)

Breaker Type	Mounting Position When Used as Subfeed Breaker	Ampere Ratings For Load	Maximum Interrupting Rating (kA) Symmetrical		
	Vertical		240V AC	480V AC	600V AC
FD6 ^③ , FXD6	Twin	70–250	65	35	22
HFD6 ^③ , HFXD6	Twin	70–250	100	65	25
JD6 ^④ , JXD6	Single	200–400	65	35	25
HJD6 ^④ , HJXD6	Single	200–400	100	65	35

① Interchangeable trip main breakers are mounted at top of panel only.
 ② Vertically mounted.

③ Twin mounted subfeed breakers are mounted at the bottom of panelboard only and adds 24" to the panel height.

④ Subfeed breaker is mounted at bottom of panelboard only. 400 amp subfeed breaker adds 24" to the panel height. (Only for use with MLO)
 ⑤ ED6/CED6 2-pole limited amps available (20-50A)

Branch Neutral Connections

Wire Range	Max. Number of Connections	Max. Amp ^③
#14-#6	26	65
#14-1/0	28	125
#6-350 kcmil	3	250
(1) #4-600 kcmil or (2) #6-250 kcmil	1	400

① BLG two-pole breaker is one phase and neutral. Three pole is two phases and neutral - See SpeedFax page 7-31
 ② 1-pole HED4 15-30A rated 65kA; 35-100A rated 25kA; 3-pole HED4 rated 42kA

③ Availability and additional specs tbd, expected late 2019. (COMPAS may allow selection of alternate trip units)
 ④ 2-pole only or two outer poles of 3-pole breaker
 ⑤ Approved for CSA and UL Listed.

⑥ Approved for CSA but not UL Listed.
 ⑦ ED6 2-pole only available in 20A, 25A and 30A. ED6 1-pole not UL listed - See SpeedFAX section 7 for more details.
 ⑧ Based on 75 degree copper.

Main Bus Amps			
125	250	400	600

Bus mounted SPD See Section 10

Service Entrance Label

Type P2 Panelboards are factory labeled suitable for use as service entrance equipment when NEC requirements are met. A panelboard cannot have more than six main disconnects, unless it is a lighting and appliance branch panelboard. Lighting and appliance branch panelboards are limited to two main disconnects. Factory installed and Field installable Service Entrance Barrier kits are now available as required by UL67 (In COMPAS, you must select Service Entrance Required).

Grounding of Panelboards

- Ground Bars except for brazed to box are shipped with the panel interior not factory mounted.
- Non-Insulated Equipment Ground Bar
 - Copper Non-Insulated Ground Bar
 - Al Insulated Equipment Ground Bar
 - Cu Insulated Equipment Ground Bar
 - Ground Bar Brazed to Box (Not recommended for painted or NEMA 3R enclosures)

Shunt Trip on Main or Branch

BL, BLH, HBL, NGB, HGB, LGB, NGB2, HGB2, LGB2, ED4, HED4, HHED6 uses 1" unit space for shunt trip. All others may be used on mains or subfeeds. See breaker section for list price adders.

Time Clocks

Time clocks may be mounted in a 23" enclosure to be cable connected to the panel. Sangamo, Tork or Paragon time clock can be supplied and mounted in panelboard cabinet. Adds 12" to panel height. Mounts in Sub-area.

Description
Time Clock (1 or 2-pole, single or double throw contacts; 3-pole, single throw) 277V maximum with plain dial
Astronomical dial
An omitting device
Reserve power or carryover
Space and mounting provisions only

Ⓞ Accessories on 1" pole breakers (BL, BQD, ED) will take unit space.

Panelboards

Embedded Micro Metering Module (Type P2 Panelboard)

Selection

SEM3™ System configured in Panelboards

The Siemens SEM3 system can be configured for factory installation in branch circuit monitoring applications using the Siemens COMPAS configuration tool. This option can lower the installation time of the system for the installer while providing a factory warranted solution.

The SEM3 system can be factory installed in unit space in type P2, P4, & P5 Siemens panel boards and SB1, SB2, & SB3 type Siemens switchboards. Please note P1 and P3 configurations are not available at this time and the amount of unit space needed varies depending upon the application. Please note that lead time adders will apply and may vary depending upon the configuration of the system.

SEM3 for use in Siemens Panelboards

Type P2: Enclosure

- Available in a NEMA 1, 3R, or 12 rated enclosure.
- Minimum width & depth: 24" width x 5.75" depth
- Height: Up to 74" depending on branch breaker selection
 - Addition of monitoring on some mains (primary and subfeed) may require additional box length. In these cases the box will be increased to the next size available as a standard design.
 - In cases where enclosure size is increased all multi-section panels will be increased to match the largest section.

Controller

SEM3 controller is mounted in unit space opposite of the feed location specified in COMPAS (i.e., bottom mount for top feed) and will require 3" of unit space. Each controller will be powered by direct tap connection to the panel section bus. Each controller can monitor up to 45 circuits. Applications that require monitoring more than 45 circuits will require additional controllers.

Current Transformers (CTs)

Five sizes of CTs are available for use in the P2 panel: 50, 125, 250, 400 & 600 amp. All CTs are pre-mounted to a support bracket that attaches to the base rail of the interior of the panel board. Each bracket supports a maximum of 3 CTs and is designed for the breaker selected (brackets are not interchangeable between breaker frames). Each CT will be attached to a data module that is placed in the meter racks.

Meter Racks

Each meter rack requires 3" of unit space. All meter racks will be installed next to the SEM3 controller in unit space. The COMPAS configuration tool will select the appropriate meter rack configuration according to the user's application and will use the 21 space meter rack as a default option where possible. Only one meter rack (regardless of number of positions) can be installed in 3" of unit space.

NOTE: Monitoring of 45 circuits will require 9" of unit space: two 21 position racks and one 3 position rack

Panelboards

Embedded Micro Metering Module (Type P2 Panelboard)

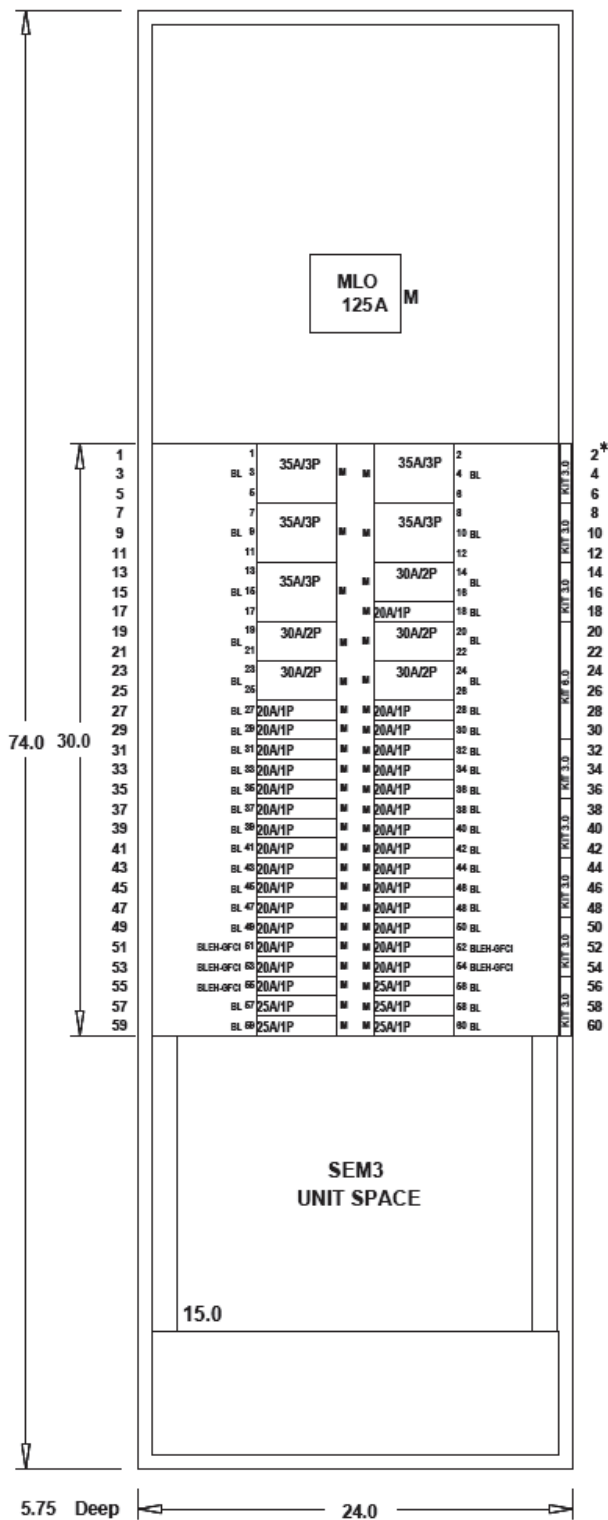

Selection

P2 Devices Enclosure sizes

Example P2 Panel with SEM3 Type 1 Enclosure (24" Wide x 5.75" Deep)

Enclosure heights are in 6" increments from 26" thru 74".
 Enclosure heights: 26", 32", 38", 44", 50", 56", 62", 68", 74"

The COMPAS configuration tool can provide actual dimensions based on the configuration.
 Example below is largest standard P2 enclosure for factory assembled panel with all small (1") branch breakers installed.

← 24" std. width →

Main Breaker / Main Lug space varies based on selected options

Unit space varies based on selected options

Note: All circuits do not have to be monitored by SEM3 - user can select any circuits in this space to be monitored.

Based on smallest branch breakers and a 3-phase main being monitored. There is a maximum of 63 circuits that can be monitored with the configuration shown. Some selections of main breakers and other subfeed options could limit this further.

In this situation there is 30" of unit space available - so 60 branch circuits could be monitored. If monitoring the main three additional circuits could be monitored with a total of 63 circuits.

This requires two controllers and three 21 position racks using 15" of unit space. - see below -

SEM3 space varies by number of circuits monitored - this uses unit space.

- == > 6" of space for up to 21 circuits monitored one controller and one 21-pos rack
- == > 9" of space for up to 42 circuits monitored one controller and two 21-pos racks
- == > 12" of space for up to 45 circuits monitored one controller and two 21-pos racks plus one 3-pos rack
- == > 15" of space for up to 63 circuits monitored two controllers and three 21-pos racks

Note: If subfeed space is needed - it will take away from available unit space.

A60 Galvannealed with ANSI 61 light gray paint is standard.

Panelboards

Type P3 Panelboards

General

Features

Another innovation from Siemens is the P3 panel. It is a smaller, footprint distribution panel to fit a large number of applications that require more (or larger) branch devices than the lighting panel class offer. This panel offers a wide array of factory-assembled options, and has the ability to mix breaker frames in unit space up to 250 amps. Bussing options for the P3 vary from the standard temperature aluminum to temperature rated copper, 750 A/Si aluminum, and 1000A/Si copper designs. All bussing in the P3 panel is tin-plated as a standard. Silver-plated copper is offered as an option on a copper bus. Integrated time clocks, bus mounted contactors, as mains or sub mains, split bus and subfeed lugs (up to 400 amp) are just a few of the options of this unique panel.

The P3 panel configurations, defined by the unit space, allow for a given amperage, main device, and box height. The P3 panel starts with a 56" high box. Breaker unit space can be mixed and matched to meet customer requirements. All 1" pole breakers (BL, BQD, xGB, xGB2, ED frames) are mounted in 3" or 6" pole increments. Breakers frames, above 125 amps, are mounted in 6" single or twin breaker mountings. QR (225A max) and 3VA52 (250A max) breakers are twin mounted in 6" unit space. A max of 6 total large frame breakers are allowed in unit space. Any subfeed breakers do not reduce this. For example, FD 250 amp and JD 400 amp breakers are mounted as subfeed breakers outside of unit space.

Like other distribution panels, the P3 panel can have blank space added into the panel to allow for future expansions or modifications. Any expansions or modifications must be in 3" increments. BL, BQD, xGB, xGB2, and ED frame breakers have 3" or 6-pole kits and can be mixed in unit space by these increments. Breakers of the same frame can cross from one mounting to another if contiguous. xGB frame breakers cannot be mixed with other frame types. Any expansion or modification must be in 3" increments also. QR frame breakers are mounted in 6" increments for two and three pole single and twin mounted units. Changes in the unit space length for BL, BQD, xGB, xGB2, or ED frame breakers require an additional deadfront center strip kit. Check with sales or the factory for additional unit space kits.

Main Lug/Main Breaker

Enclosure – Standard Type 1 enclosure is 24" wide x 7.75" deep. X Box Height is determined by main device and unit space. See charts for box height.

Voltage – 600V AC max.
250V DC max.

Amperage – 800 amp max.

Short Circuit Rating – 200 Kaic max. symmetrical or equal to the lowest rated device installed unless a series rating is indicated. Panels with subfeed or feed-thru lugs without a main device, circuit breaker or fusible unit, are limited to a three-cycle rating. The three-cycle rating for the P3 panel is limited to 22 Kaic. Note that the main device may be mounted remote from the panel.

Bussing – The P3 panel has more options to meet market requirements. The standard bussing is temperature rated aluminum. The rating is per the requirements of UL 67 – the standard for panelboards. All aluminum bussing is tin-plated. Optional bussing for the P3 panel is: 750 A/si aluminum, temperature rated copper, and 1000 A/si copper. The copper bus option for this panel is tin-plated.

Weight – Approximate

Total panelboard weight when filled with a normal quantity of breakers and accessories is about 5 lbs. (1 kg) per inch (54g per mm) of box height.

Gauge Steel of Boxes Fronts, Surface & Flush

Dimensions in inches (mm)		Gauge Steel	
Width	Height	Box	Front
24" (610)	56 - 80" (1422, 2032)	#16	#14

Neutral Connectors

Wire Range	Max. Number of Connections	Max. Amps
#14-#1/0	44	125
#4 - 350 kcmil	6	250
(1)#4 - 600 kcmil or (2)#6 - 250 kcmil	1	400

① BLG two-pole breaker is one phase and neutral. Three pole is two phases and neutral - See SpeedFax page 7-31
 ② 1-pole HED 15-30A rated 65kA; 35-100A rated 25kA: 3-pole HED rated 42kA
 ③ Availability and additional specs tbd, expected late 2019. (COMPAS may allow selection of alternate trip units)

④ Twin Mount 3VA52 available 2018 with Thermal Magnetic Trip (TMTU), 3VA62 with Electronic Trip (ETU) availability tbd.
 ⑤ 2-pole only or two outer poles of 3-pole breaker
 ⑥ Approved for CSA and UL Listed.
 ⑦ Approved for CSA but not UL Listed.

⑧ Twin mounted subfeed breakers are mounted at bottom of panelboard only and adds 24" to the panel height.
 ⑨ Subfeed breaker is mounted at bottom of panelboard only. 400 amp subfeed breaker adds 30" to the panel height.

Service Entrance Label

Type P3 Panelboards are factory labeled suitable for use as service entrance equipment when NEC requirements are met. A panelboard cannot have more than six main disconnects, unless it is a lighting and appliance branch panelboard. Lighting and appliance branch panelboards are limited to two main disconnects. Factory installed and field installable Service Entrance Barrier kits are now available as required by UL67 (In COMPAS, you must select Service Entrance Required).

Grounding of Panelboards

Ground Bars except for brazed to box are shipped with the panel interior not factory mounted.

- Non-Insulated Equipment Ground Bar
- Copper Non-Insulated Ground Bar
- Al Insulated Equipment Ground Bar
- Cu Insulated Equipment Ground Bar
- Ground Bar Brazed to Box (Not recommended for painted or NEMA 3R enclosures)

Shunt Trip on Main or Branch

BL, BLH, HBL, BQD, ED4, HED4, ED6, HHED6, QR2, QRH2, HQR2, HQR2H as branch only. BL, BLH, HBL, NGB, HGB, LGB, ED4, HED4, ED6, HHED6 uses 1" unit space for shunt trip. All others may be used on mains or subfeeds.

Time Clocks

Time clocks may be mounted in a 23" enclosure to be cable connected to the panel. Sangamo, Tork or Paragon time clock can be supplied and mounted in panelboard cabinet. Adds 12" to panel height. Mounts in Sub-area.

Description
Time Clock (1 or 2-pole, single or double throw contacts; 3-pole, single throw) 277V maximum with plain dial
Astronomical dial
An omitting device
Reserve power or carryover
Space and mounting provisions only

[Ⓞ] Accessories on 1" pole breakers (BL, BQD, ED) will take unit space.

① Subfed lugs are currently not offered as standard with main circuit breakers.

② Subfed lugs on panels above 400A are not standard.

③ 200% neutral cannot be provided along with a 400A subfeed breaker because the breaker blocks the 4th lug site.

Breaker Kits and Accessories

Kit Number	Description	Contents
BBKB32 (P2/P3)	BL/BQD 6-pole 3" branch breaker kit	Kit contains top barrier, (3) A/C connectors, (1) B connector, hardware
BBKNB32 (P2/P3)	NGB, HGB, LGB 6-pole 3" branch breaker kit	Kit contains top barrier, (3) A/C connectors, (1) B connector, hardware
BBKGB32 (P2/P3)	NGB2, HGB2, LGB2 6-pole 3" branch breaker kit	Kit contains top barrier, (3) A/C connectors, (1) B connector, hardware
BBKEB32 (P3)	NEB/HEB 6-pole 3" branch breaker kit	Kit contains top barrier, (3) A/C connectors, (1) B connector, hardware
BBKED32 (P2/P3)	ED 6-pole 3" branch breaker kit	Kit contains breaker support, inter-phase barriers, (3) A/C connectors, (1) B connector, hardware
BBKQ2 (P3)	Branch breaker kit for 2 and 3-pole QJ twin mount	Kit contains all connectors and cover plates necessary to mount both 2 and 3-pole breakers
BBKQR2 ^{①③}	P3 twin BKR mounting kit for QR 1-phase/3-phase	Kit contains all connectors and cover plates necessary to mount both 2 and 3-pole breakers (limit 6 QR per panel)
BBKVA52P3T ^②	P3 strap kit; twin mount 3VA52 branch	Uses 6" of unit space. Includes 2x BBKVA52P3HW, barrier, straps, & mounting hardware.
BBKA52P3HW	P3 branch breaker hardware kit	Includes screw retainers & mounting screws.
DFFP3	Deadfront filler 3"	3" empty space filler and hardware
DFFP6	Deadfront filler 6"	6" empty space filler and hardware
P3BK1	P3 bonding kit 800A max MLO+MB	Bonding strap and hardware. For all MLO+MB configurations.
EBF1	HEB/NEB Filler Plate	Filler Plate
BBKQRP2FK	P3 Filler for QR. Dual mount horizontal. 1-phase/3-phase.	Kit contains all cover plates necessary to change from QJ to QR both 2 and 3-pole breakers. For 1-phase panel, both breakers must change from QJ to QR, cannot have one of each installed.
SEBK3P3V1 ^②	Service entrance barrier kit CFD, FD (P3 only)	Kit contains barrier, mounting brackets, and hardware
SEBK1P2P3V1 ^②	JD, LD Service Entrance Barrier Kit (RP1, P1, P2, P3)	Kit contains barrier, mounting brackets, and hardware
SEBK2P3V3	FD, QJ, QR Horizontal Main Service Entrance Barrier (P2, P2 with SEM3, P3)	Kit contains barrier, mounting brackets, and hardware

① Although QR is rated 250A, it is limited to 225A in panelboard.

② Factory installed and Field installable Service Entrance Barrier kits are now available as required by UL67. (In COMPAS, you must select Service Entrance Required.)

③ Maximum 6 large frame breakers in unit space. (QR + 3VA52)

Panelboards

Type P3 Panelboards

Dimensions

PANELBOARDS 11

Type 1 Box

Box is symmetrical

(UL approved construction. 16 gage steel or equivalent alternate construction. 14 or 12 gage is available as an optional special order.)
G60 Galvanized is standard without paint.

Type 3R and 3R/12 Box

(UL approved construction. 16 gage steel can with 14 gage front or similar approved construction.)
A60 Galvannealed with ANSI 61 light gray paint is standard.

①Dimensions are interior of the box. Add 5/8" to width for absolute dimension. Add 1/8" to height for absolute dimension.
Dimensions shown in inches and millimeters [].

3VA Breaker Configuration Information in Panelboards

Panelboard Specific 3VA Accessories Available in Panelboards

3VA Series Accessories

There are 4 positions on each side of the trip handle of the 3VA52 breaker. Accessories can be 1, 2 or 3 positions wide and fit in specific locations as shown on charts and on the inside cover of each breaker.

Accessory types:

3VA breaker auxiliary releases allow remote electrical tripping of the circuit breaker

- **STL** – Shunt Trip Left
- **STF** – Shunt Trip Flexible
- **UVR** – Undervoltage Releases Trip
- **UNI** – Universal Release - Shunt Trip and an Undervoltage Release are Combined

All Auxiliary and Alarm Switches for 3VA breakers belong to an integrated range of accessories

- **AUX_HQ / AUX_HP** – Auxiliary Switches
- **LCS_HQ / LCS_HP** – Leading Changeover Switches
- **TAS_HQ / TAS_HP** – Trip Alarm Switches
- **EAS_HQ / EAS_HP** – Electrical alarm switches

3VA Auxiliary and Alarm Switches have standard (HQ) and high capacity (HP) types as well as "electronic" versions for example: **AUX_HQ_el**

* Padlock accessory will be available in a future release.

* 100% rated may have reduced ranges

3VA accessories install easily. Special Hardware kit for P3 Twin Mount aligns screw for easy installation.

3VA Breaker Configuration Information in Panelboards

P1 Lighting Panel General information

Minimum enclosure size: 20" wide x 5.75" deep

PANELBOARDS 11

P1 Lighting Panelboard

P1 interiors have unit space setup for either:
 A) BL/BQD type of breakers only
 or
 B) xGB type of breakers only (current product)
 (xGB and 3VA41 in same interior is in development)

P1 Lighting Panel

P1 Main Space can include:

- Main Lugs: 250A or 400A max
 Main Breaker Types:
- 100A max BL/BQD & 125A max. xGB or ED
 - 225A max. QR series (horizontal mount)
 - 250A max. FD series (horizontal mount)
 - 400A max. JD series (vertical mount)

Future 3VA offering in development:

- 125A max. 3VA41 (TMTU) (horiz. mount)
 - 250A max. 3VA52/62 (TMTU/ETU) (horiz. mount)
 - 400A max. 3VA53/63 (TMTU/ETU) (vertical mount)
- (ETU = Electronic Trip Unit)
 (TMTU = Thermal Magnetic Trip Unit)

P1 Branch Breakers — Small Frame only:

- a) 100A max BL series
- b) 100A max BQD series
- c) 125A max xGB series (cannot mix with BL/BQD)

Future 3VA offering in development:

- d) 125A max. 3VA41 TMTU
- Will share same interior as xGB.
 New 3VA52 offering has many field installable accessories available.

P1 Subfeed Space offering:

- Feed-thru Lugs:
 A) 225A/250A, 400A, 600A or 800A
 B) Surge Protection Devices (SPD)
 C) Subfeed Breakers:
 - 250A max. FD twin mount vertical
 - 400A max. JD single mount vertical

Future 3VA offering in development:

- D) 250A max. 3VA52 TMTU (vertical twin mount)
- E) 400A max. 3VA63 ETU (vertical mount)

3VA Breaker Configuration Information in Panelboards

P2 Lighting Panel General information

Minimum enclosure size: 20" wide x 5.75" deep

P2 Lighting Panelboard

P2 interiors have flexible unit space setup for Multiple Branch Breaker Types and many different Main/Subfeed options.

Neutral Cross Strap
 - positions for mounting Neutral lugs
 - many different configurations are used.

Neutral Strips:
 1/0 max. cable size
 "Step lugs" and other varieties depending on the configuration
 - factory assembled only
 - optional field installable kits may be added in near future to include 2/0 capability.

Various Branch Breaker Strap Kits installed

Field installable Neutral Extension can be added for AFCI/GFCI when needed due to short pigtails. It can be positioned anywhere along the base rail on either side.
 kit # **BNKP2EX1**

Bus Bars:
 250A - CU or AL
 400A - CU or AL600A - CU or AL

P2 Lighting Panel

P2 Main Space can include:

- Main Lugs: 125A, 250A, 400A or 600A
 ==> also Subfeed Lugs: 125A, 250A or 400A
- Main Breaker Types:
- 100A max. BL/BQD or 125A max. xGB or ED
 - 250A max. FD series (horizontal mount)
 - 400A max. JD series (vertical mount)
 - 600A max. LD series (vertical mount)

Future 3VA offering in development:

- 250A max. 3VA52/62 (TMTU/ETU) (horiz. mount)
 - 400A max. 3VA53/63 (TMTU/ETU) (vertical mount)
 - 600A max. 3VA54/64 (TMTU/ETU) (vertical mount)
- (ETU = Electronic Trip Unit)
 (TMTU = Thermal Magnetic Trip Unit)

P2 Branch Breakers — Small Frame:

- a) 100A max BL series
- b) 100A max BQD series
- c) Various AFCI/GFCI series
- d) 125A max ED series (480V delta capable)
- e) 125A max xGB series
- f) 125A max GB2 series (480V delta capable)

Future 3VA offering in development:

- g) 125A max. 3VA41 TMTU (480V delta capable)

P2 Branch Breakers — Large Frame (6 max.)

- 1) 225A max QR series (total 225A/250A frame, six per panel limit)

Future 3VA offering in development:

- 2) 150A max 3VA61 ETU single mount
- 3) 250A max 3VA52/62 TMTU/ETU single mount

Subfeed Space offering:

- Feed-thru Lugs:
- A) 125A, 250A, 400A, or 600A
 - B) Surge Protection Devices (SPD)
 - C Subfeed Breakers:
 - 250A max. FD twin mount vertical
 - 400A max. JD single mount vertical

Future 3VA offering in development:

- 250A max. 3VA52/62 (TMTU/ETU) (vertical twin mount)
- 400A max. 3VA53/63 (TMTU/ETU) (vertical single mount)

3VA Breaker Configuration Information in Panelboards

P3 Lighting Panel General information

Minimum enclosure size: 24" wide x 7.75" deep

P3 Lighting Panelboard

P3 interiors have flexible unit space setup for Multiple Branch Breaker Types and many different Main/Subfeed options.

P3 Lighting Panel

P3 Main Space can include:

Main Lugs: 250A, 400A, 600A or 800A
 ==> also Subfeed Lugs: 250A or 400A

Main Breaker Types:

- 250A max. FD series (horizontal mount)
- 400A max. JD series (vertical mount)
- 600A max. LD series (vertical mount)

Future 3VA offering in development:

- 250A max. 3VA52/62 (TMTU/ETU) (horizontal mount)
 - 400A max. 3VA53/63 (TMTU/ETU) (vertical mount)
 - 600A max. 3VA54/64 (TMTU/ETU) (vertical mount)
- (ETU = Electronic Trip Unit)
 (TMTU = Thermal Magnetic Trip Unit)

P3 Branch Breakers — Small Frame:

- a) 100A max BL series
- b) 100A max BQD series
- c) Various AFCI/GFCI series
- d) 125A max ED series (480V delta capable)
- e) 125A max xGB series
- f) 125A max GB2 series (480V delta capable)

Future 3VA offering in development:

P3 Branch Breakers — Large Frame (6 max.)

- 1) 225A max QR series (twin mount)
- 2) 250A max 3VA52 Series (twin Mount) (total 225A/250A frame, 6 per panel limit)

Future 3VA offering in development:

- 3) 250A max 3VA62/3VA61 ETU single mount

New 3VA offering has many field installable accessories available.

P3 Subfeed Space offering:

Feed-thru Lugs:

- A) 225A/250A, 400A, 600A or 800A
- B) Surge Protection Devices (SPD)

C) Subfeed Breakers:

- 250A max. FD twin mount vertical
- 400A max. JD single mount vertical

Future 3VA offering in development:

- 250A max. 3VA52/62 (TMTU/ETU) (vertical twin mount)
- 400A max. 3VA53/63 (TMTU/ETU) (vertical single mount)

Main Lugs shown installed

Neutral Cross Straps
 - top and bottom
 - positions for mounting up to four 350 kcmil Neutral lugs each

Neutral Strips:
 1/0 max. cable currently
 - factory assembled only
 - optional field installable kits may be added in near future to include 2/0 max. capacity neutral kits.

Various Branch Breaker Strap Kits installed

Bus Bars:
 250A - CU or AL
 400A - CU or AL
 600A - CU or AL
 800A - CU or AL

Neutral Cross Straps

P3 interior is similar to P2 but has a 2 inch high riser to allow for larger Breakers and additional gutter space.

Deadfront Supports

Base Rails

Main Space

Subfeed Space

3VA Breaker Configuration Information in Panelboards

P4 Power Panel General information

Minimum enclosure size: 32" wide x 10" deep

PANELBOARDS

P4 Power Panel

P4 interiors have unit space setup for Multiple Branch Breaker Types and many different Main Breaker options.

Neutral Connections*
 - at Main end of panel
 - Various configurations.
 * Depends on breaker selection
 - Consult factory for details

Main Lugs shown installed

SEM3 CT's installed

Various Branch Breaker Strap Kits installed

Bus Bars: CU or AL

SEM3 Controller and Meter module racks

P4 Unit Space below Bus: There is no actual Subfeed space.- All Space is unit space, but at the bottom below the bus, there can be additional components such as the SEM3 devices shown.

Main Space
 - Mains are mounted in unit space
 - All are horizontal mount

Unit Space below Bus

P4 Power Panel

P4 Main Space can include:

- Main Lugs:** 400A, 600A, 800A, 1000A or 1200A
- Main Breaker Types:** (horizontal mount)
- 100A max. BL/BQD or 125A max. xGB or ED
 - 400A max. JD and VL-JG series
 - 600A max. LD and VL-LG series
 - 800A max. LM and VL-MG series

Future 3VA offering in development:

- 400A max. 3VA53/63 (TMTU/ETU)
- 600A max. 3VA54/64 (TMTU/ETU)
- 800A max. 3VA55/65 (TMTU/ETU)

(ETU = Electronic Trip Unit)
 (TMTU = Thermal Magnetic Trip Unit)

P4 Branch Breakers — Small Frame:

- a) 100A max BL series (10, 22, 65 kaic @ 240V)
- b) 100A max BQD series (14 kaic @ 480/277V)
- c) Various AFCI/GFCI series
- d) 125A max ED series (480V delta capable)
- e) 125A max xGB seriesf) 125A max GB2 series (480V delta capable)
- g) 150A max 3VA51 TMTU (new 2019)

Future 3VA offering in development:

- h) 125A max. 3VA41 TMTU (480V delta capable)

P4 Branch Breakers — Large Frame (6 max.)

- 1) 150A max VL-DG series
- 2) 150A 3VA61 ETU Series (new 2019)
- 3) 225A max QR series
- 4) 250A max FD or VL-FG series
- 5) 250A max 3VA52/62 TMTU/ETU (new 2019)
- 6) 400A max JD and VL-JG series
- 7) 600A max. LD and VL-LG series
- 8) 800A max. MD and VL-MG series

Future 3VA offering in development:

- 9) 400A max. 3VA53/63 (TMTU/ETU)
- 10) 600A max. 3VA54/64 (TMTU/ETU)
- 11) 800A max. 3VA55/65 (TMTU/ETU)

New 3VA offerings have many field installable accessories available including strap kits.

(See Strap Kit Table page 11-77).

Vented Front Cover

P4 Standard Box Width is 32" W

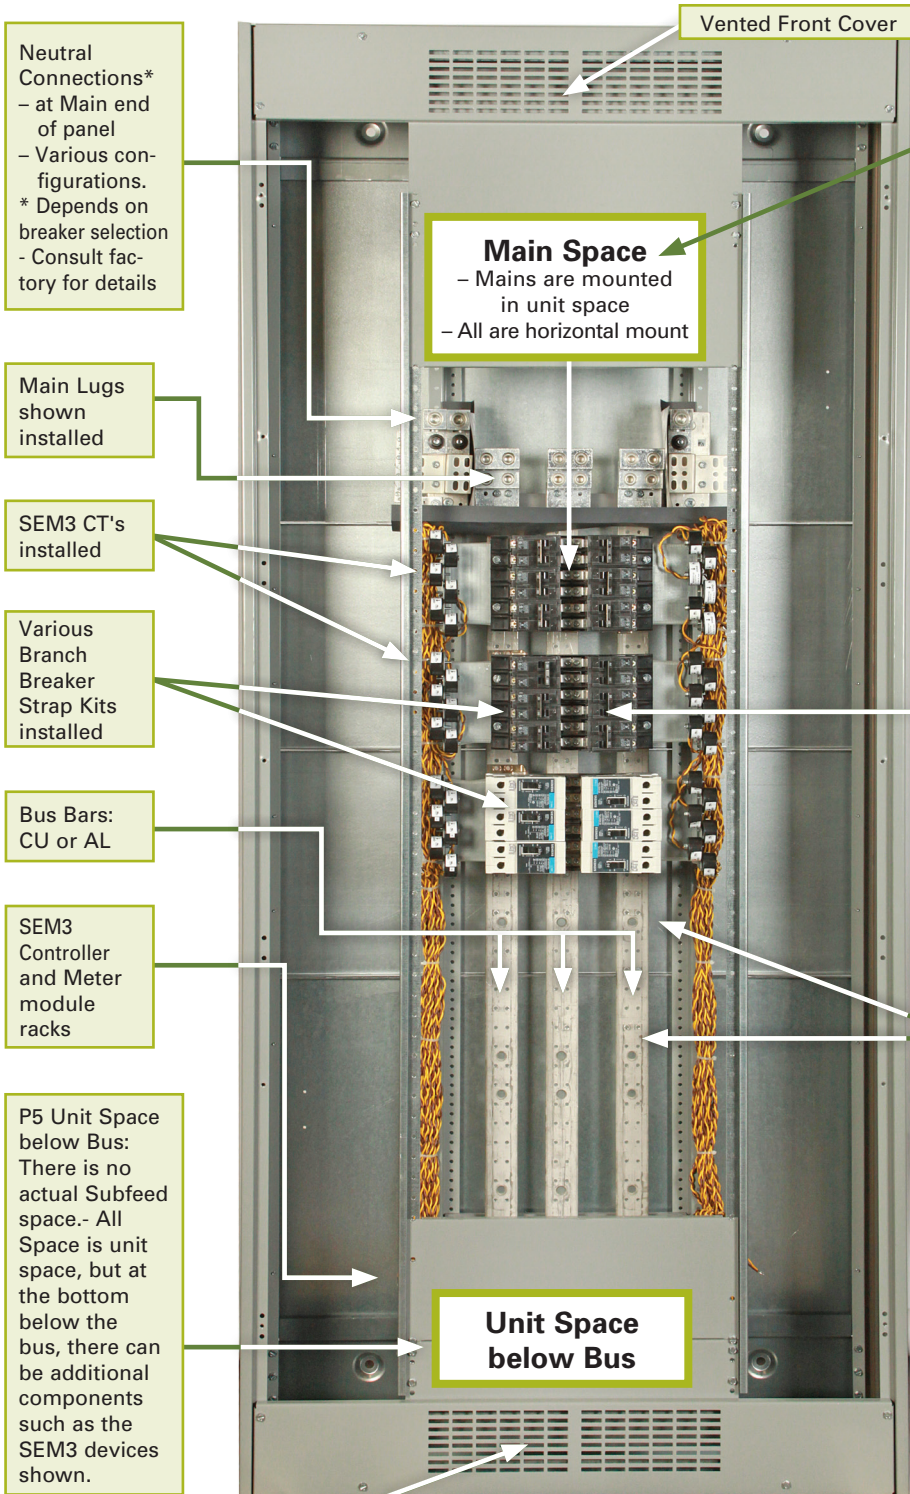

3VA Breaker Configuration Information in Panelboards

P5 Power Panel General information

Minimum enclosure size: 38" wide x 10" deep

P5 Power Panel

P5 interiors have unit space setup for Multiple Branch Breaker Types and many different Main Breaker options.

Neutral Connections*
 - at Main end of panel
 - Various configurations.
 * Depends on breaker selection
 - Consult factory for details

Main Lugs shown installed

SEM3 CT's installed

Various Branch Breaker Strap Kits installed

Bus Bars: CU or AL

SEM3 Controller and Meter racks

P5 Unit Space below Bus:
 There is no actual Subfeed space.- All Space is unit space, but at the bottom below the bus, there can be additional components such as the SEM3 devices shown.

Main Space
 - Mains are mounted in unit space
 - All are horizontal mount

Unit Space below Bus

Vented Front Cover

P5 Standard Box Width is 38" W

P5 Power Panel

P4 Main Space can include:

- Main Lugs:** 400A, 600A, 800A, 1000A or 1200A
- Main Breaker Types:** (horizontal mount)
- 400A max. JD and VL-JG series
 - 600A max. LD and VL-LG series
 - 800A max. LM and VL-MG series
 - 1200A max. ND and VL-NG series

Future 3VA offering in development:

- 400A max. 3VA53/63 (TMTU/ETU)
- 600A max. 3VA54/64 (TMTU/ETU)
- 800A max. 3VA55/65 (TMTU/ETU)

(ETU = Electronic Trip Unit)
 (TMTU = Thermal Magnetic Trip Unit)

P5 Branch Breakers — Small Frame:

- a) 100A max BL series
- b) 100A max BQD series
- c) Various AFCI/GFCI series

- 8) 800A max. MD and VL-MG series
- 9) 1200A max. ND and VL-NG series

Future 3VA offering in development:

- 10) 400A max. 3VA53/63 (TMTU/ETU)
- 11) 600A max. 3VA54/64 (TMTU/ETU)
- 12) 800A max. 3VA55/65 (TMTU/ETU)

3VA Breaker Configuration Information in Panelboards

3VA Electronic Trip Units

Selection

3VA6 ETU – "Electronic Trip" versions of 3VA Breakers used in Panelboards

- See following pages for internal accessory pocket locations available in TMTU & ETU versions
- Standard part number shown for base trip unit - other variations available shown in lower chart
- Breakers shown do not include lugs - lugs are ordered separately as needed per application
- COMPAS will allow various Lug configurations based on Panel Type and mounting location

Connector Kits for 3 Pole 3VA6 series Breakers

For Accessories and positions see tables on pages 11-64 and 11-68

Description note: Use 3-pole for 2-pole applications	One Connector Kit required for each breaker when panel mounted.	Connector Kits	AL	CU

① Some accessories may be "field install only" if not available in COMPAS, or not available for use in Panelboards

② Many accessories available for the 3VA5 and 3VA6 breakers may not be suitable for use in Lighting Panelboards.
- COMPAS allows only options that are available for factory assembly.

Some accessories listed above may not be available for all Panelboard configurations.
③ Lugs are NOT supplied with loose breaker as standard - must order separately or configure in COMPAS to include lugs.
- Factory assembled panels include AL lugs as standard without control wire tap, CU lugs are optional. These kits include 3 connectors and hardware.

3VA Breaker Configuration Information in Panelboards

Internal and External Accessories for 125A 3VA Breakers

Selection

Accessories for 3VA41 TMTU 125A max. only

- 6 slots max. are available - 3 on each side of trip handle.\
- COMPAS will allow only modules that will be allowed in panel being configured.
- Note: 3VA41 2-pole and "1-pole in 2-pole frame" have only 3 Left side Accessory pockets available.

^① High capacity/power (HP) max. Amps load capacity is higher than standard module (.55A up to 6.0A) depends on Voltage and AC/DC requirements - see SpeedFAX section 7 or 3VA documentation for more information.

^② Many accessories available for the 3VA4, 3VA5 and 3VA6 breakers may not be suitable for use in Lighting Panelboards.
- COMPAS allows options that are available. All accessories listed above can be used with Panelboards in general, but there will be exceptions.

^③ Lugs are NOT supplied with loose breaker as standard - must order separately or configure in COMPAS to include lugs.

- Factory assembled panels include AL lugs as standard, CU lugs are optional. These kits include 3 connectors and hardware

^④ Special electronically-compatible (el) variants are available for applications that require the auxiliary switch signals to be linked to low voltage systems.
- May need special Mod in COMPAS.

3VA Breaker Configuration Information in Panelboards

Internal and External Accessories for 150-250A 3VA Breakers

Selection

Accessories for 3VA52, 3VA61 and 3VA62 breakers

- 3VA52 TMTU 250A max. and 3VA61 ETU 150A max. and 3VA62 ETU 250A max.
- 6 - 8 slots max. are available – 4 on each side of trip handle.
- COMPAS will allow only modules that will be allowed in panel being configured.

Description	Quick reference code	Voltage AC max or range	Voltage DC max or range	Accessory Catalog Number ²	Qty of slots in breaker req'd	Max. Qty. per Brkr	Position to install for 3VA52/61/62 only

¹ High capacity/power (HP) max. Amps load capacity is higher than standed module (.55A up to 6.0A) depends on Voltage and AC/DC requirements - see SpeedFAX section 7 or 3VA documentation for more information.
² Many accessories available for the 3VA5 and 3VA6 breakers may not be suitable for use in Lighting Panelboards.
 - COMPAS allows options that are available. All accessories listed above can be used with Panelboards in general, but there will be exceptions."

³ Lugs are NOT supplied with loose breaker as standard - must order separately or configure in COMPAS to include lugs.
 - Factory assembled panels include AL lugs as standard, CU lugs are optional. These kits include 3 connectors and hardware.
⁴ Special electronically-compatible (el) variants are available for applications that require the auxiliary switch signals to be linked to low voltage systems.
 - May need special Mod in COMPAS.

3VA Breaker Configuration Information in Panelboards

⁴ Special electronically-compatible (el) variants are available for applications that require the auxiliary switch signals to be linked to low voltage systems.
 - May need special Mod in COMPAS.

Panelboards

Type P4 Panelboards

General

PANELBOARDS 11

Features

The P4 panel has a medium sized footprint and fits a larger number of applications that require larger branch devices and higher amp ratings than what the lighting panel class offers. Even with the increased capacity, this panel is a space saver with its 32" width and 10" depth. The P4 panel offers a wide array of factory-assembled options and has the ability to mix breaker frames in unit space up to 800 amps and fusible switches up to 200 amps. Bussing options for the P4 vary from the standard temperature rated aluminum to temperature rated copper and 750A/SI aluminum and 1000A/SI copper designs. All aluminum bussing in the P4 panel is tin-plated as a standard. Silver-plated is offered as the default for copper bus and tin as an option. Integrated time clocks, bus mounted contactors as mains or submains, split bus and subfeed lugs (up to 600 amp) are just a few of the options of this flexible panel.

The 3 panel configurations defined by the unit space allowed for a given amperage, main device and box height. The P4 panel starts with a 60" high box. All of the branch devices are unit space mounted. Breakers and switches can be mixed and matched to meet customer requirements.

Enclosure Selection^①

^① Standard trim is four piece without door. Surface or flush one piece trim is available for 32 in. (813 mm) wide circuit breaker panel.
^② Solid state (electronic) trip units only.

Main Lug / Main Breaker

Enclosure – Standard Type 1 enclosure is 32" wide x 10" deep. The Box Height is determined by main device and unit space. See charts for box height. Voltage – 600V AC max. 250V DC max.

Amperage – 400-800 amp main breaker or 400-1200 amp main lug only.

Short Circuit Rating – 200 KAIC max. symmetrical or equal to the lowest rated device installed unless a series rating is indicated. Panels with subfeed or feed-thru lugs without a main device, circuit breaker or fusible unit, are limited to a three-cycle rating. The three-cycle rating for the P4 panel is limited to 42 KAIC. Note that the main device may be mounted remote from the panel.

Bussing – The P4 panel has more options to meet market requirements. The standard bussing is temperature rated aluminum. The rating is per the requirements of UL 67 – the standard for panelboards. All aluminum bussing is tin-plated. Optional bussing for the P4 panel is: 750 A/SI aluminum, temperature rated copper, and 1000 A/SI copper. The copper bus option for this panel is silver-plated.

Weight – Approximate

Total panelboard weight when filled with a normal quantity of breakers and accessories is about 8 lbs. (1 kg) per inch (54g per mm) of box height.

Main Lugs^①

Ampere Rating	Connectors Suitable for Copper or Aluminum
400	(1) - #3/0 AWG-500 kcmil (2) - #3/0 AWG-250 kcmil
600	(2) - #3/0 AWG-500 kcmil
800	(3) - #3/0 AWG-500 kcmil
1000	(4) - #3/0 AWG-500 kcmil
1200	(4) - #3/0 AWG-500 kcmil

^① Alternate lugs for 750 kcmil cable are available, but result in significant loss of branch unit mounting space. Consult Siemens.

Panelboards

Type P4

Shown with Standard Mains, Top Fed and Surface Trim

Catalog number is for aluminum main bus. For optional copper main bus change "A" in position 11 to "E" (silver-plated copper bus).

Panels are top feed, surface mounted. For bottom feed, change "T" in position 12 to "B". For flush mounting, change "S" in position 13 to "F".

Replace fifth and sixth position in panelboard catalog number, with alternate main breaker code. Use price adders from main breaker section table. Horizontally mounted.

Main Lugs Only — shown with aluminum bus, top fed, and surface trims.

① BLG two-pole breaker is one phase and neutral. Three pole is two phases and neutral - See SpeedFax page 7-31
 ② 1-pole HED 15-30A rated 65kA; 35-100A rated 25kA; 3-pole HED rated 42kA

③ Availability and additional specs tbd, expected late 2019. (COMPAS may allow selection of alternate trip units)
 ④ 2-pole only or two outer poles of 3-pole breaker

⑤ Accessories such as shunt trips on 3 pole breakers require 6.25" of unit space
 ⑥ Approved for CSA and UL Listed.
 ⑦ Approved for CSA but not UL Listed.

200-200	10	F672

For inches / millimeters conversion, see Application Data section.

- ① Includes housing frame plate without breaker handle opening. Provisions include all necessary mounting hardware less breakers.
- ② For Class J, R or T fuse clip prices, refer to page 11-78. For Class J fuse clips price 600V, 7½" high units.
- ③ NEC fuse clips only.

- ④ Normal stock item.
- ⑤ Suitable to replace QF3 in P1 thru P5 Panelboards and Switchboards.
- ⑥ To replace a QJ with a QR only a new cover is needed up to 225A

Spanner Wrenches (for Vacu-Break Switches)

Ground Fault on Main Breaker

Description
Conventional Ground Fault ^① Includes: ground fault relay, ground sensor, CPT & shunt trip
Test and Monitor Panel ^②
Ground Fault add to Sensitrip III breaker price

Time Clocks ^③

Sangamo, Tork or Paragon time clock can be supplied, mounted in panelboard cabinet. For required increase in enclosure dimension, consult local sales office.

Description
Time clock (1- or 2-Pole, Single or Double Throw Contacts; 3-Pole Single Throw)
277V Maximum with Plain Dial
Optional: Astronomical Dial An Omitting Device Reserve Power or Carryover
Space and Mounting Provisions Only

Circuit Breaker Accessories Handle Blocking Device Blocks handle in either the "ON" or "OFF" position.

Padlocking Device – Padlocks in "OFF" position.

Main Bus

Standard main bus and ground bus are tin-plated aluminum. For copper main bus, neutral bus and ground bus, add from the table for each panel.

Lugs – For Main Lug Only Panels

Standard main lugs and neutral lugs are tin-plated aluminum, UL listed for use with aluminum/copper cables. Copper only lugs are an option.

Ampere Rating	Breaker Type
400A	JXD6H, HJXD6H
	SCJD6H, SHJD6H
	NJY, HJY, LJY
600A	LXD6H, HLXD6H
	NMY ^⑤ , HMY ^⑤ , LMY ^⑤

^① Available in 90" high enclosure only. Unit space is 42 1/2" with Test and Monitor Panel; 45" without Test and Monitor Panel.

^② Not available on Sensitrip III.

^③ For required unit space, consult local sales office.

^④ Shunt Trip on 100A frame breakers increases mounting height to 6.25" for twin mounting.

^⑤ The 600A, 100% rated breaker requires the use of an 800A frame breaker.

Panelboards

Embedded Micro Metering Module

Selection

SEM3 System configured in Panelboards

The Siemens SEM3 system can be configured for factory installation in branch circuit monitoring applications using the Siemens COMPAS configuration tool. This option can lower the installation time of the system for the installer while providing a factory warranted solution.

The SEM3 system can be factory installed in unit space in type P2, P4, & P5 Siemens panel boards. Please note P1 and P3 configurations are not available at this time and the amount of unit space needed varies depending upon the application. Please note that lead time adders will apply and may vary depending upon the configuration of the system.

SEM3 for use in Siemens Panelboards

Available in a NEMA 1, 3R, or 12 rated enclosure

Controller

SEM3 controller is mounted in unit space opposite of the feed location specified in COMPAS (i.e., bottom mount for top feed) and will require 3" of unit space. Each controller will be powered by direct tap connection to the panel section bus. Each controller can monitor up to 45 circuits. Applications that require monitoring more than 45 circuits will require additional controllers.

Current Transformers (CTs)

Seven sizes of CTs are available for use in the P4 panel: 50, 125, 250, 400, 600, 800, 1200 amp. All CTs are pre-mounted to a support bracket that attaches to the base rail of the interior of the panel board. Each bracket supports a maximum of 3 CTs and is designed for the breaker selected (brackets are not interchangeable between breaker frames). Each CT will be attached to a data module that is placed in the meter racks.

Meter Racks

Each meter rack requires 3" of unit space. All meter racks will be installed next to the SEM3 controller in unit space. The COMPAS configuration tool will select the appropriate meter rack configuration according to the user's application and will use the 21 space meter rack as a default option where possible. Only one meter rack (regardless of number of positions) can be installed in 3" of unit space.

NOTE: Monitoring of 45 circuits will require 9" of unit space: two 21 position racks and one 3 position rack

Other Considerations

Configuration: Data modules from CTs monitoring a circuit breaker must be mounted adjacent to one another in the meter rack. Any field changes to the factory configuration must take this into account.

Start-up & Commissioning: Siemens can provide these services. Contact your local SIEMENS PDS Power Solutions Business Developer for more details.

Billing Services for sub billing applications: Billing services are available. Contact your local SIEMENS PDS Power Solutions Business Developer for more details.

Panelboards

Embedded Micro Metering Module

Selection

P4 Devices Enclosure sizes

**Example P4 Panel with SEM3 Type 1 Enclosure
P4 = (32" Wide x 10" Deep)**

Enclosure heights are in 15" increments from 60" thru 90".
Enclosure heights: 60", 75", 90" (there are optional depths also)

The COMPAS configuration tool can provide actual dimensions based on the configuration. Example below is largest standard P4 enclosure for factory assembled panel - unit space is in 3.75" increments - up to 6 circuits can occupy each 3.75" of unit space.

← 32" std. width for P4 →

Main Breaker / Main Lug space varies based on selected options

Unit space varies based on selected options

Note: All circuits do not have to be monitored by SEM3 - user can select any circuits in this space to be monitored.

Based on smallest branch breakers and a 3-phase main being monitored. There is a maximum of 63 circuits that can be monitored with the configuration shown. Some selections of main breakers and other subfeed options could limit this further.

In this situation there is 37.5" of unit space available - so 60 branch circuits could be monitored. If monitoring the main three additional circuits could be monitored with a total of 63 circuits.

This requires two controllers and three 21 position racks using 18.75" of unit space. - see below -

SEM3 space varies by number of circuits monitored - this uses unit space.

- == > 7.5" of space for up to 21 circuits monitored one controller and one 21-pos rack
- == > 11.25" of space for up to 42 circuits monitored one controller and two 21-pos racks
- == > 15" of space for up to 45 circuits monitored one controller and two 21-pos racks plus one 3-pos rack
- == > 18.75" of space for up to 63 circuits monitored two controllers and three 21-pos racks

Note: If subfeed space is needed - it will take away from available unit space.

Due to gutter space limitations, SEM3 is not available in a P4 Powerpanel for 3VA52, 3VA61, or 3VA62 breakers.

Lug Modifications

Panelboards

Type P5 Panelboards

General

Features

The P5 is the largest distribution panel in the Siemens' panel family. Even with a larger footprint, the P5 is still a space saver with its 38" width and 12.75" depth. The panel offers higher main ratings to fit applications that require larger branch devices.

This panel offers a wide array of factory assembled options and has the ability to mix breaker frames in unit space up to 1200 amps and fusible switches up to 1200 amps. Bussing options for the P5 vary from the standard temperature rated aluminum to temperature rated copper and 750 A/SI aluminum and 1000A/SI copper designs. All aluminum bussing in the P5 panel is tin-plated as a standard. Silver-plated is offered as the default for copper bus and tin as an option. Integrated time clocks, bus mounted contactors as mains or submains, split bus and subfeed lugs (up to 600 amps) are just a few of the options of this flexible panel.

The P5 panel configurations defined by the unit space allowed for a given amperage, main device and box height. The P5 panel starts with a 60" high box. All of the branch devices are unit space mounted. Breakers and switches can be mixed and matched to meet customer requirements.

Main Lug / Main Breaker / Main Switch

Enclosure – Standard Type 1 enclosure is 38" wide x 12.75" deep. X Box Height is determined by main device and unit space. See charts for box height.

Voltage – 600V AC max.
250V DC max.

Amperage – 400-1200 amp main breaker, 400-1200 amp main lug only or 200-1200 amp main switch.

Short Circuit Rating – 200 Kaic max. symmetrical or equal to the lowest rated device installed unless a series rating is indicated. Panels with subfeed or feed-thru lugs without a main device, circuit breaker or fusible unit, are limited to a three-cycle rating. The three-cycle rating for the P5 panel is limited to 42 Kaic. Note that the main device may be mounted remote from the panel.

Bussing – The P5 panel has more options to meet market requirements. The standard bussing is temperature rated aluminum. The rating is per the requirements of UL 67 – the standard for panelboards. All aluminum bussing is tin-plated. Optional bussing for the P5 panel is: 750 A/SI aluminum, temperature rated copper, and 1000 A/SI copper. The copper bus option for this panel is tin-plated.

Weight – Approximate

Total panelboard weight when filled with a normal quantity of breakers and accessories is about 10 lbs. (1 kg) per inch (54g per mm) of box height.

Main Lugs ①

Ampere Rating	Connectors Suitable for Copper or Aluminum
400	(1) 250-500Kcmil
600	(2) #3/0-500Kcmil
800	(3) #3/0 AWG-500 Kcmil
1000	(4) #3/0 AWG-500 Kcmil
1200	(4) #3/0 AWB-500 Kcmil

① Alternate lugs for 750 kcmil cable are available, but result in significant loss of branch unit mounting space. Consult Siemens.

For inches / millimeters conversion, see Application Data section.

① For 600V, change "F" in position 3 to "G". Price only branch breakers with 600V ratings.
② For ground fault, see page 11-92.

③ Replace "MS" in catalog number with code letter. (See Main Fusible Switch Table above)
④ 800 and 1200 ampere switches have "L" class fuse provisions (Type HCP).

① BLG two-pole breaker is one phase and neutral. Three pole is two phases and neutral - See SpeedFax page 7-31
 ② 1-pole HED 15-30A rated 65kA; 35-100A rated 25kA; 3-pole HED rated 42kA

③ Availability and additional specs tbd, expected late 2019. (COMPAS may allow selection of alternate trip units)
 ④ 2-pole only or two outer poles of 3-pole breaker

⑤ Accessories such as shunt trips on 3 pole breakers require 6.25" of unit space
 ⑥ Approved for CSA and UL Listed.
 ⑦ Approved for CSA but not UL Listed.

3VA Breaker Provision Kits

Breaker Type	Catalog Number	Description
3VA52, 3VA61 or 3VA62 Breaker	S3VA52PR	Contains the necessary hardware to land breaker on an existing strap kit

Service Entrance Barriers

Field installable Barriers to meet UL 67 service entrance requirements	
Breaker Type	Catalog Number
(S)JD, (S)LD, MG	SEBP4V1
CJD, CLD	SEBP4V2
JG, LG	SEBP4V3
(S)MD,(S)ND without shield	SEBP5V1
(S)MD,(S)ND with shield	SEBP5V2
Vacu-Break Switches	SEBP5V3
HCP Switches	SEBP5V4

For inches / millimeters conversion, see Application Data section.

① Normal stock item.

② Includes cover plate and mounting hardware, less circuit breaker.

③ Also fits Types FCI, FCII, SB1 and SB2 switchboards.

④ 800–1200 amp units are HCP switch.

⑤ Suitable to replace QF3 in P1 thru P5 Panelboards and Switchboards

⑥ To replace a QJ with a QR only a new cover is needed up to 225A

⑦ Although QR is rated 250A, it is limited to 225A in panelboard.

⑧ To field install a single 3VA52, 3VA61 or 3VA62 breaker to an existing strap, provision kit #S3VA52PR is required.

⑨ 3VA62 breaker will be available in Fall 2019.

Note: When a front filler plate is not completely filled with breakers, the openings in the unused space must be closed with filler plates selected from this table.

Ground Fault on Main Breaker

Description	Amp Rating
Conventional Ground Fault ^② Includes:	
Ground Fault Relay, Ground Sensor, CPT and Shunt Trip	800-1200
Test and Monitor Panel ^③	
Ground Fault add to Sensitrip III breaker price (takes 5" of unit space)	800-1200

Time Clocks^④

Sangamo, Tork or Paragon time clock can be supplied, mounted in panel-board cabinet. For required increase in enclosure dimension, consult local sales office.

Description
Time clock (1- or 2-Pole, Single or Double Throw Contacts; 3-Pole Single Throw)
277V Maximum with Plain Dial
Optional: Astronomical Dial An Omitting Device Reserve Power or Carryover
Space and Mounting Provisions Only

Circuit Breaker Accessories Handle Blocking Device Blocks handle in either the "ON" or "OFF" position.

Padlocking Device – Padlocks in "OFF" position.

Main Bus

Standard main bus and ground bus are tin-plated aluminum. For copper main bus, neutral bus and ground bus, add from the table for each panel.

Lugs – For Main Lug Only Panels

Standard main lugs and neutral lugs are tin-plated aluminum, UL listed for use with aluminum/copper cables. Copper only lugs are an option.

Ampere Rating
400 - 1200

Shunt Trip on Main and Branches^⑤

Description
BL, BQD, NGB, HGB, LGB, NGB2, HGB2, LGB2 (branch only)
QR2, QRH2, HQR2, HQR2H ED4, HED4, HHED6, CED6 (branch only)

1200	NNY, HNY, LNY
	NXD6H, HNXDH,

① For use on main lug, main breaker or main switch panels without subfeed breakers.

② Available in 90" high enclosure only. Unit space is 42½" with Test and Monitor Panel; 45" without Test Monitor Panel.

③ Not available on Sensitrip III.

④ For required unit space, consult local sales office.

⑤ Shunt Trip on 100A frame breakers increases mounting height to 6.25" for twin mounting.

⑥ The 600A, 100% rated breaker application requires the use of an 800A frame breaker.

⑦ The 800A, 100% rated breaker application requires the use of a 1200A frame breaker.

Panelboards

Embedded Micro Metering Module™

Selection

SEM3 System configured in Panelboards

The Siemens SEM3 system can be configured for factory installation in branch circuit monitoring applications using the Siemens COMPAS configuration tool. This option can lower the installation time of the system for the installer while providing a factory warranted solution.

The SEM3 system can be factory installed in unit space in type P2, P4, & P5 Siemens panel boards. Please note P1 and P3 configurations are not available at this time and the amount of unit space needed varies depending upon the application. Please note that lead time adders will apply and may vary depending upon the configuration of the system.

SEM3 for use in Siemens Panelboards

Available in a NEMA 1, 3R, or 12 rated enclosure

Controller

SEM3 controller is mounted in unit space opposite of the feed location specified in COMPAS (i.e., bottom mount for top feed) and will require 3" of unit space. Each controller will be powered by direct tap connection to the panel section bus. Each controller can monitor up to 45 circuits. Applications that require monitoring more than 45 circuits will require additional controllers.

Current Transformers (CTs)

Seven sizes of CTs are available for use in the P5 panel: 50, 125, 250, 400, 600, 800, 1200 amp. All CTs are pre-mounted to a support bracket that attaches to the base rail of the interior of the panel board. Each bracket supports a maximum of 3 CTs and is designed for the breaker selected (brackets are not interchangeable between breaker frames). Each CT will be attached to a data module that is placed in the meter racks.

Meter Racks

Each meter rack requires 3" of unit space. All meter racks will be installed next to the SEM3 controller in unit space. The COMPAS configuration tool will select the appropriate meter rack configuration according to the user's application and will use the 21 space meter rack as a default option where possible. Only one meter rack (regardless of number of positions) can be installed in 3" of unit space.

NOTE: Monitoring of 45 circuits will require 9" of unit space: two 21 position racks and one 3 position rack

Other Considerations

Configuration: Data modules from CTs monitoring a circuit breaker must be mounted adjacent to one another in the meter rack. Any field changes to the factory configuration must take this into account.

Start-up & Commissioning: Siemens can provide these services. Contact your local SIEMENS PDS Power Solutions Business Developer for more details.

Billing Services for sub billing applications: Billing services are available. Contact your local SIEMENS PDS Power Solutions Business Developer for more details.

Panelboards

Embedded Micro Metering Module™

Selection

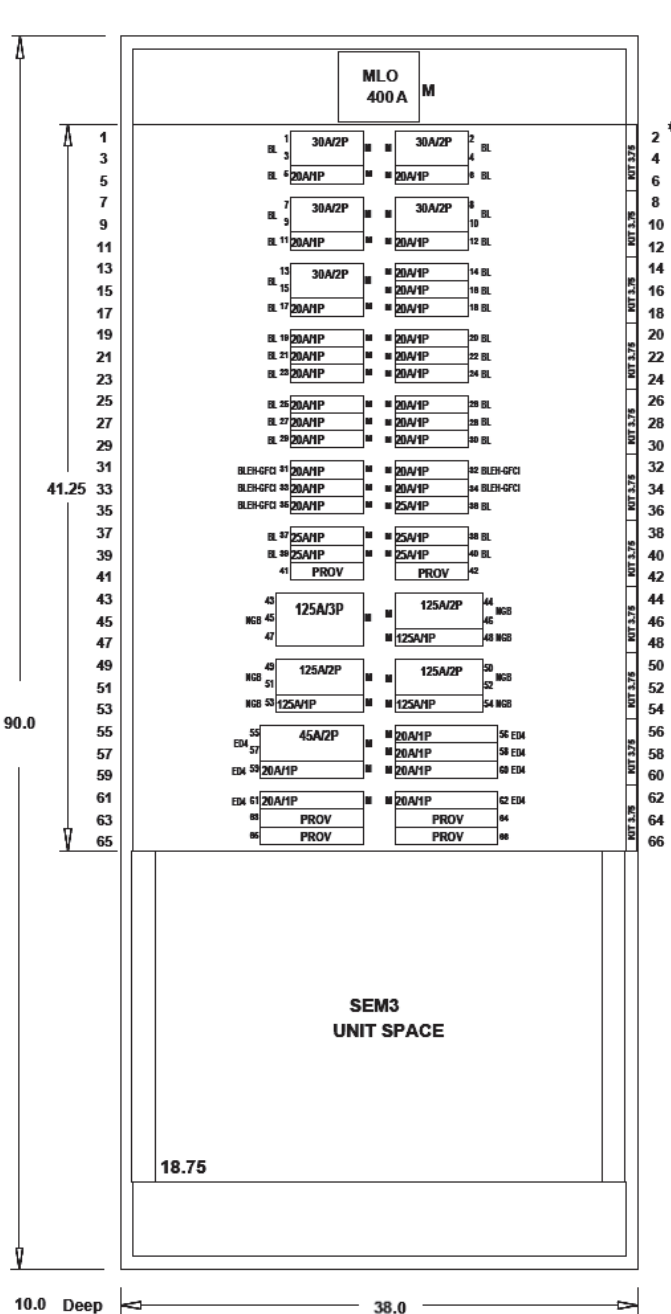

PANELBOARDS 11

P5 Devices Enclosure sizes

Example P5 Panel with SEM3 Type 1 Enclosure P5 = (38" or 46" Wide x 10" Deep)

Enclosure heights are in 15" increments from 60" thru 90".
Enclosure heights: 60", 75", 90" (there are optional depths also)

The COMPAS configuration tool can provide actual dimensions based on the configuration. Example below is largest standard P4 enclosure for factory assembled panel - unit space is in 3.75" increments - up to 6 circuits can occupy each 3.75" of unit space.

← 38" std. width for P5 →

Main Breaker / Main Lug space varies based on selected options

Unit space varies based on selected options

Note: All circuits do not have to be monitored by SEM3 - user can select any circuits in this space to be monitored.

Based on smallest branch breakers and a 3-phase main being monitored. There is a maximum of 63 circuits that can be monitored with the configuration shown. Some selections of main breakers and other subfeed options could limit this further.

In this situation there is 37.5" of unit space available - so 60 branch circuits could be monitored. If monitoring the main three additional circuits could be monitored with a total of 63 circuits.

This requires two controllers and three 21 position racks using 18.75" of unit space. - see below -

SEM3 space varies by number of circuits monitored - this uses unit space.

- == > 7.5" of space for up to 21 circuits monitored one controller and one 21-pos rack
- == > 11.25" of space for up to 42 circuits monitored one controller and two 21-pos racks
- == > 15" of space for up to 45 circuits monitored one controller and two 21-pos racks plus one 3-pos rack
- == > 18.75" of space for up to 63 circuits monitored two controllers and three 21-pos racks

Note: If subfeed space is needed - it will take away from available unit space.

Panelboards

Listed by Underwriter's Laboratories,
Inc., under "Panelboards" File #E2269.

Meets Federal Specification
W-C375B/Gen.

Service

240 Volts Maximum. 1-Phase, 3-Wire, or
3-Phase, 4-Wire.

Panelboards Fronts and Doors

Standard panelboards are furnished with
trim with a flush door lock. All are factory
assembled for ease of installation. Fronts
are fabricated from code gauge steel and
finished ANSI-61.

Main Breakers C1

BL, BLH and HBL frame breakers are
mounted horizontally. All other frames
are mounted vertically.

Main Breakers C2

BQD frame breakers are mounted
horizontally. All other frames are
mounted vertically.

Boxes

C1 — 7 $\frac{7}{8}$ " wide, 5 $\frac{3}{4}$ " deep.
C2 — 8 $\frac{1}{2}$ " wide, 5 $\frac{3}{4}$ " deep.

Branch Breaker Side Gutters

Type	Circuit Breaker	Side Gutter (inches)

Breaker Kits and Accessories

Kit Number	Description	Contents
MBKQRC1FK	C1 Filler for QR in Main position 1PH or 3PH	Kit contains all cover plates necessary to change from QJ to QR both 2 and 3-pole breakers.

Column Extension

Available in various standard lengths, extensions are 5¼ inches deep and 7 inches wide.

Height (inches)	Catalog Number ^①
14	LXX-14
20	LXX-20
26	LXX-26
32	LXX-32
38	LXX-38
41	LXX-41
44	LXX-44

65	LXX-65
68	LXX-68
74	LXX-74
80	LXX-80
86	LXX-86

Pull Boxes

Two styles of pull boxes are available, top and front mounted. When the panel and its extensions are mounted in a structural WF beam a front mounted pull box is required. When the panels are surface mounted, a top mounted pull box may be used. Provisions are made so that the neutral bar may be mounted in the pull box when required. (Front mounted pull box dimensions are 14" H. X 20" W.)

Description	Catalog Number ^①
Top Mount	LXXP-T
Front Mount ^②	LXX50-F

For inches / millimeters conversion, see Application Data section.

① Must be ordered as a manual line.
② Includes 50" extension.

Panelboards

Telephone and Equipment Cabinets

Selection/Dimensions

Telephone and Equipment Cabinets: Conform to requirements of Underwriters' Laboratories, Inc., for all cabinets and boxes bearing their label. Surface and Flush enclosures: box and front constructed of code-gauge steel, box galvanized and front only finished with light gray, ANSI-61. Cabinets provided without backboards.

Boxes: Standard construction has blank end walls, without knockouts.

Fronts: Siemens Fas Latch fronts feature concealed hinges and fastening screws. Match P1 and P2 Panels in appearance. Two locks supplied on doors more than 51 inches high.

Catalog Symbol: SQSCP4

Description

Panelboards for commercial/industrial branch or service entrance applications on systems up through 600Vac.

The SQSCP is specifically designed to address the NEC® Selective Coordination Requirements for Emergency, Legally Required Standby, Healthcare Essential Electrical and Critical Operation Power Systems (COPS) per NEC® 700.28, 701.27, 645.27 and 708.54. Not for applications requiring AFCI protected circuits. The SQSCP is configured to order for the application. To confirm availability of options and constructions, contact your Siemens distributor.

Ratings

Volts: 600Vac (or less), 125 Vdc
 Amps: 30, 60, 100, 200, 225, 400A
 SCCR: 20kA or 100kA @ 125Vdc—See panelboard short circuit ratings table for AC ratings.

Agency information

- UL 67—Standard for panelboards
- UL 50/UL 50E—Enclosures for electrical equipment
- CSA 22.2, No. 29-M1989—Panelboards and encl. panelboards
- UL listed, class CTL panelboard (meets editions of the NEC prior to 2008 with regard to the NEC® 408.15 limit of 42 overcurrent devices per panel)
- UBC and CBC Seismic Qualified and IBC Approved

Main options

- Main lug only (MLO)
- Fused main disconnect
- Non-fused main disconnect

Branch disconnect options

- 1-, 2-, and 3-pole 15, 20, 30, 40, 50, 60, 70, 90, and 100A rejecting branch disconnects (see table for details).
 Branch ampacity on 125Vdc panels limited to SCCPB 80A or less.

Branch circuit positions

- 18, 30 and 42

Neutral options

- Unbonded and bonded 200A, 400A and 800A

Ground options

- Isolated and non-isolated

Enclosures

- NEMA 1 and NEMA 3R. Other ratings available. Consult factory.

Spare fuse compartment

- Six space spare fuse compartment standard on all models

Panelboards

Enclosure/System Types, AC & DC Voltages

NEMA 1

- Flush or surface mount.
- Galvanized steel with removable end walls –blank or with knockouts to order.
- Box sizes: 20" W x 5.75" D x 33", 50", 59" or 69" H (510 W x 145 D x 838, 1270, 1500 or 1753mm H). Box can be rotated 180° to accommodate conduit feed.
- Enclosure and chassis mounting instructions are found in supplied literature.
- Chassis mounts directly onto studs in the enclosure.
- Trim finished with gray powder coat paint over phosphatized steel (ANSI 61).
- Door and door-in-door configurations with locks.
- Door locks use key #2A1910-2.
- Circuit directory card is located on the inside of the door.
- Trim screws are concealed.

NEMA 3R

- Surface mount only.
- Finished with gray powder coat paint over phosphatized steel (ANSI 61).
- Bottom feed only, no knockouts
- Box sizes: 20" W x 7.7" D x 34.5", 51.5", 60.5" or 70.5 H (510 W x 195 D x 876, 1310, 1535 or 1791mm H).
- Enclosure and chassis mounting instructions are found in supplied literature
- Chassis mounts directly onto studs in the enclosure.
- Gasketed door has vault handle with lock.
- Door locks use key #2A1910-1.
- Circuit directory card is located on the inside of the door.

Busing

Tin-plated copper with sufficient cross section to meet UL 67 temperature rise requirements.

Distributed 1- & 3-phase busing

All SCCPB branch disconnects can be mounted in any branch circuit position.
